WORKSHOP OVERVIEW

Welcome to the TechEd 2020 workshop session ANA368 covering the topic of Hybrid Scenarios with SAP Data Warehouse Cloud (DWC) and SAP BW/4HANA.

In this workshop, we will be importing a sales data model which resides on a BW/4HANA 2.0 system into DWC, where we will combine it with further sales data uploaded via flat files (CSV). We will expand upon the data model in DWC, and visualize the data using SAP Analytics Cloud (SAC).

Workshop Topics and Exercises

During this workshop, we will cover the following topics via presentations and exercises:

1. Introduction to the Sales Data Model
2. Logging onto DWC and Creating the First Space (IT Space)
3. Importing the BW/4HANA Data Model to DWC
4. Creating the Second Space (LoB Space)
5. Importing Additional Sales Data via Flat File
6. Build the First Story in the IT Space
7. Combining Data from Spaces to Visualize Data in SAC
8. Expand the Data Model in DWC with Sentiment Analysis

Workshop Information

During the workshop, please use the user that has been assigned to you with the naming convention:

- saptechedana368+XXX@sap.com

Where 'XXX' represents your individual participant number. In the following exercise instructions, we have been logged in with the user saptechedana368+001@sap.com.

All users have the password: **SAPTechEd2020!**

The DWC tenant for this workshop is: <https://dwc-teched2020.eu10.hcs.cloud.sap/dwaas-ui/index.html#/home>

For the workshop material, we will be working with the Best Run Bikes sales data.

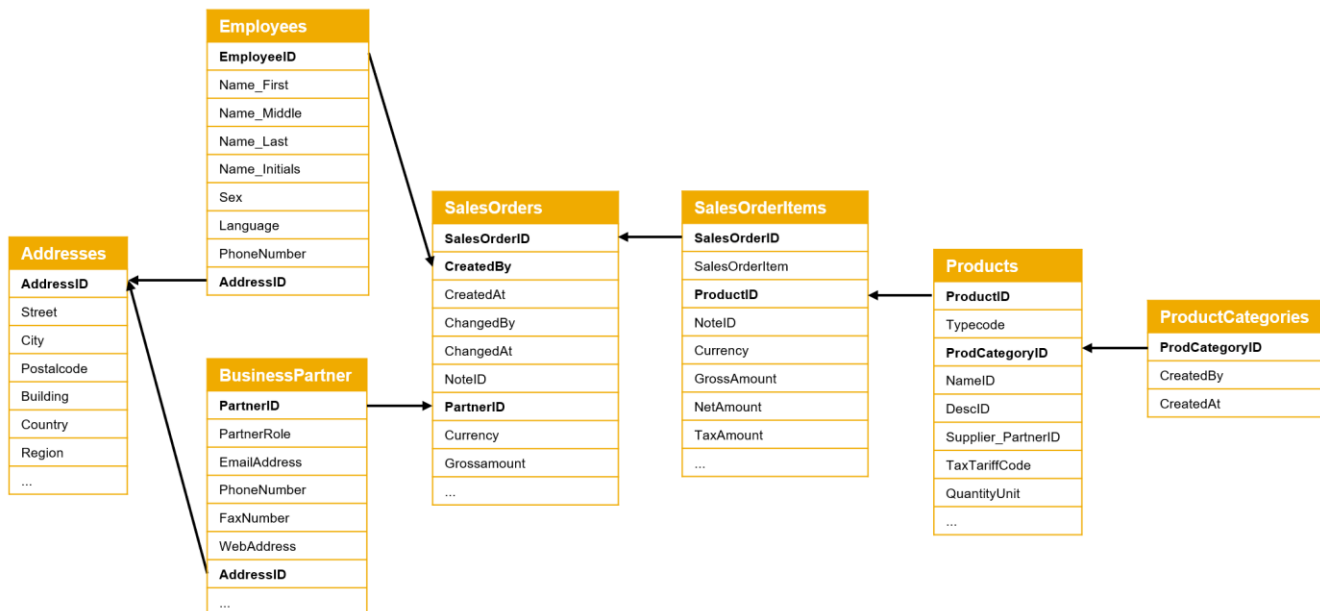

The data will be coming from a connection to an SAP BW/4HANA 2.0 system and merged in the model with data uploaded as flat files. You will find the needed flat files in the GitHub repository: **teched2020-ANA368**.

1. INTRODUCTION TO THE SALES DATA MODEL

In this section, we will introduce the data model in SAP BW/4HANA 2.0 that we will be importing to DWC for the hybrid scenario. The data sets may be familiar to some that have worked with SAP DWC tutorials previously, as we will be using the Best Run Bikes sales data.

DEMO Content: Table Description

The demo content mentioned in this document is based on a Sales Order scenario. The model is developed in a way that it covers the basic scenarios as well as a few advanced scenarios.

SalesOrders

This dataset contains consolidated order details with Gross Amount, Net Amount, and Tax Amount aggregated for each order, i.e. one row per order. It also contains Partner information, creating employee, Sales Organization for region details (for e.g. EMEA, APJ, etc.) and most importantly, the three status flags for an order – BillingStatus, DeliveryStatus, LifecycleStatus. These status flags have three possible values – I (In Progress), C (Completed) and X (Canceled).

Foreign keys in this dataset – CreatedBy and ChangedBy (EmployeeID from Employees), PartnerID (PartnerID from BusinessPartner)

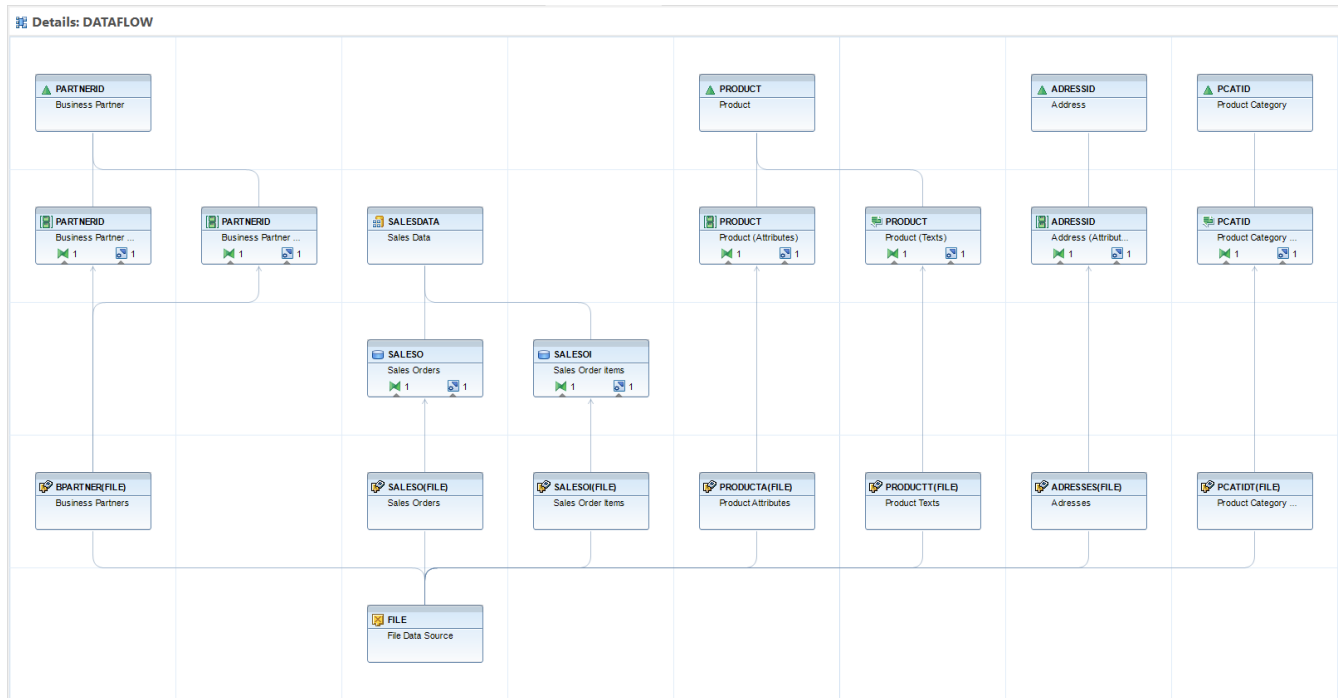

SalesOrderItem

This dataset contains the breakdown of each order from SalesOrders, therefore, redundant data for SalesOrderID is included. This is the right place to find the products that have been ordered, quantity of the products, and pricing details for each product. The DeliveryDate column in this dataset impacts the DeliveryStatus flag in SalesOrders. In case of a canceled order, the date in this column is set to "99991231".

Foreign keys in this dataset – ProductID (ProductID from Products)

Sales Data Model in BW/4HANA

Although you do not have to access the BW/4HANA system for this workshop, we will show you how the data model looks in BW Modeling Tools to give you an overview:

As can be seen, the data is loaded from 7 different Data Sources into BW/4HANA. Two ADSOs store the Sales Orders and the Sales Order Items, which are combined in the BW Query **SALESDATA_Q001** (this will be shown as *Semantic Query* in the Business Builder when imported to DWC). The remaining sources are modeled as Characteristic InfoObjects in the DataFlow. We will be adding the Characteristics of PARTNER and PRODUCT to our sales data model in DWC later in this workshop.

ANA368

When we import this data from BW/4HANA into DWC, we should see the following objects in the Data Builder:

Files (8)							
	Business Name	Technical Name	Type	Created By	Created On	Changed By	Changed On
<input type="checkbox"/>	 /BIC/MPARTNERID	BICMPARTNERID	Remote Table	SAPTechED ANA368_001	Oct 21, 2020 14:13	SAPTechED ANA368_001	Oct 21, 2020 14:13

	<div>📦</div> Business Partner	Dimension (Business Entity)	SAPTechED ANA368_001	Oct 21, 2020 14:14	SAPTechED ANA368_001	Oct 21, 2020 14:14
	<div>📦</div> Product	Dimension (Business Entity)	SAPTechED ANA368_001	Oct 21, 2020 14:14	SAPTechED ANA368_001	Oct 21, 2020 14:14
	<div>📊</div> Sales Data	Analytical Dataset (Business Entity)	SAPTechED ANA368_001	Oct 21, 2020 14:14	SAPTechED ANA368_001	Oct 21, 2020 14:14
	<div>⚙️</div> Semantic Query	Consumption Model	SAPTechED ANA368_001	Oct 21, 2020 14:14	SAPTechED ANA368_001	Oct 21, 2020 14:14

As part of this workshop, we will be combining this data imported from BW/4HANA into a Space in DWC with data coming from Flat Files imported to another Space in DWC.

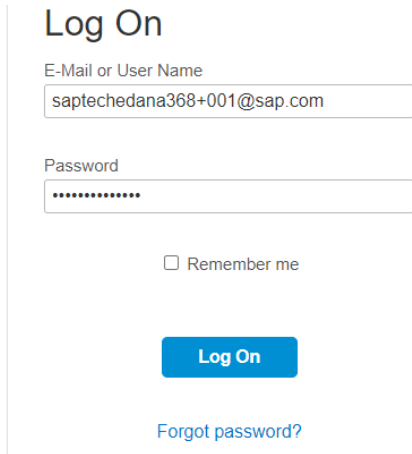

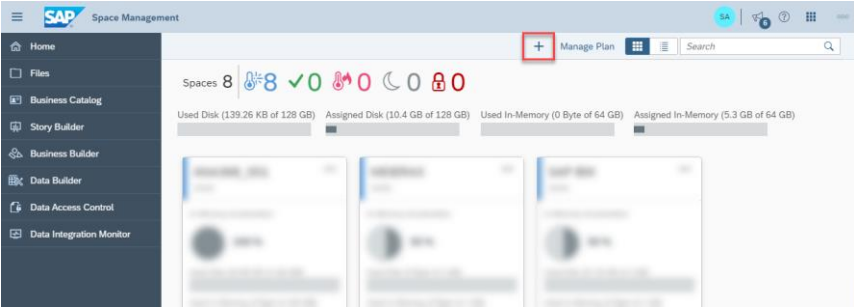

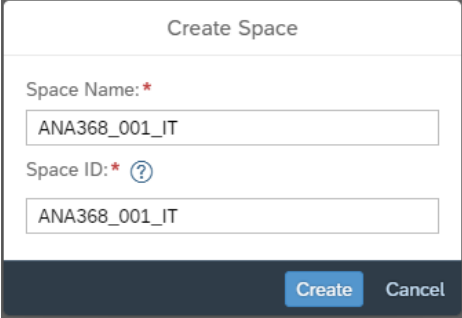

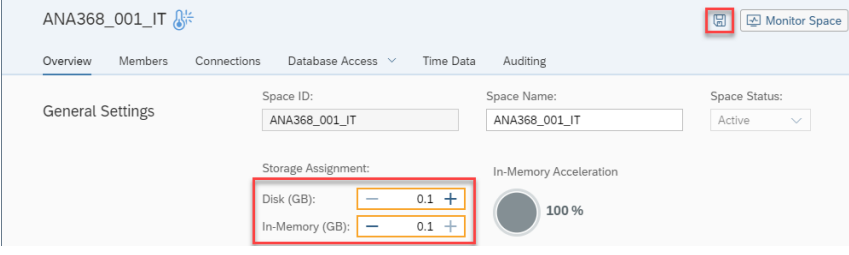

2. LOGGING ONTO DWC AND CREATING THE FIRST SPACE (IT SPACE)

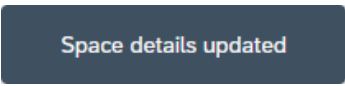

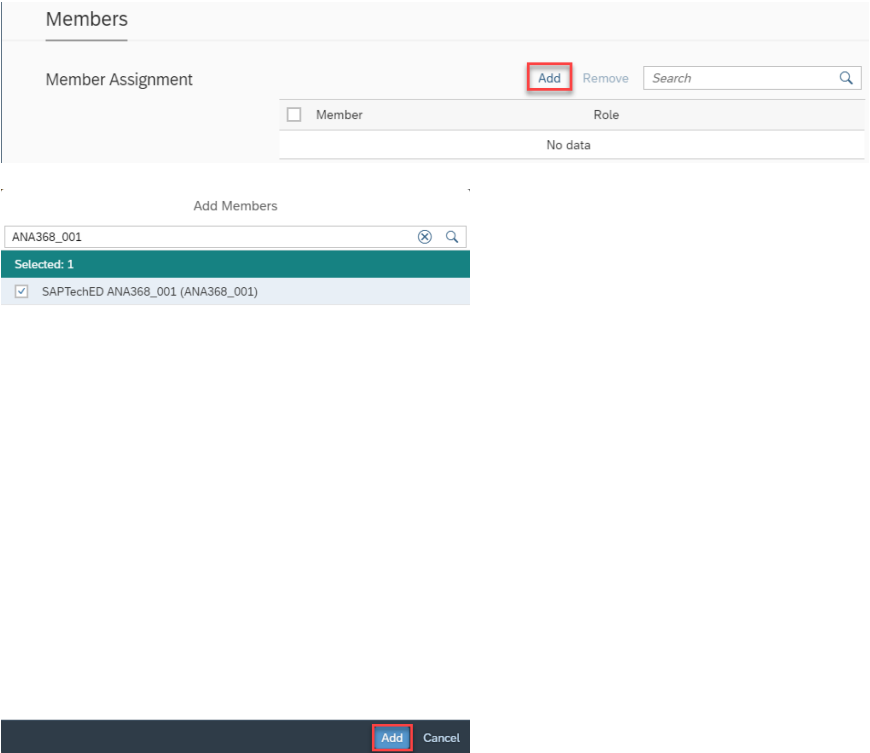

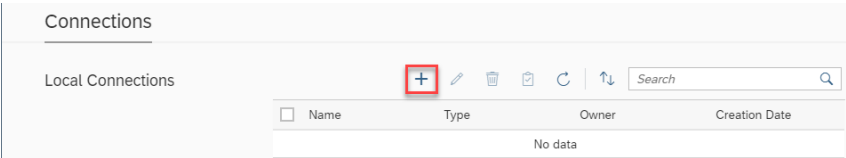

Before you can import the data from BW/4HANA, you need to log into DWC, and create the first Space for this hybrid scenario.

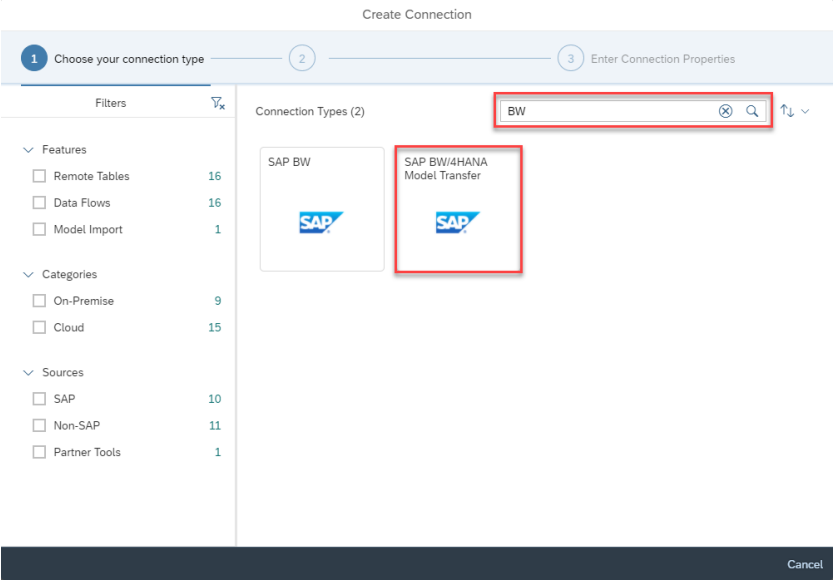

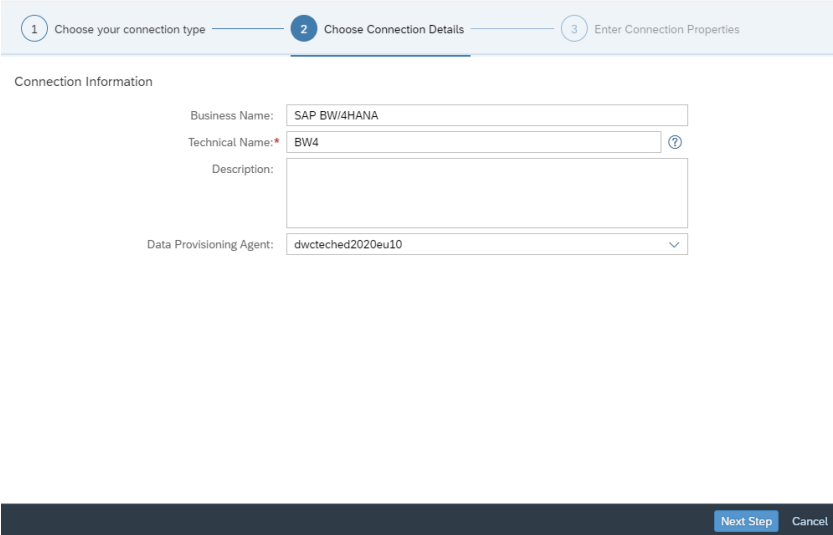

Exercise Description

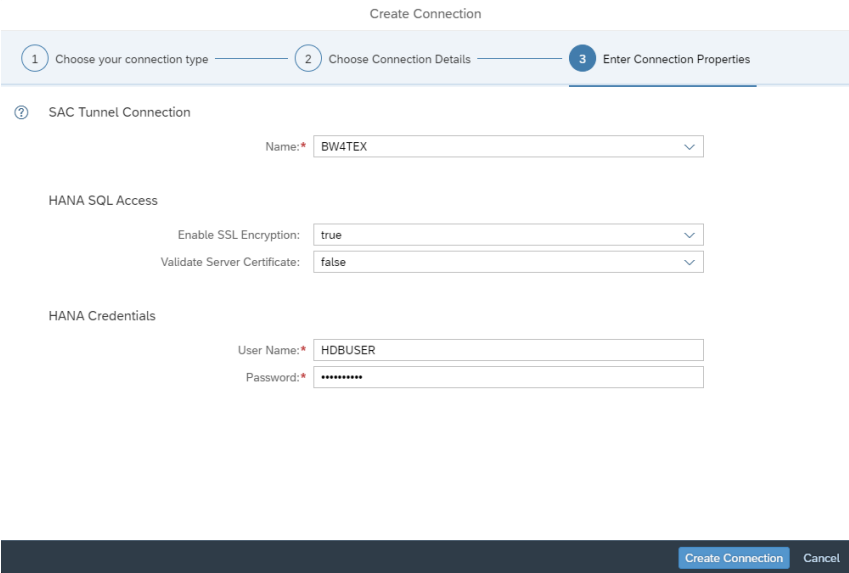

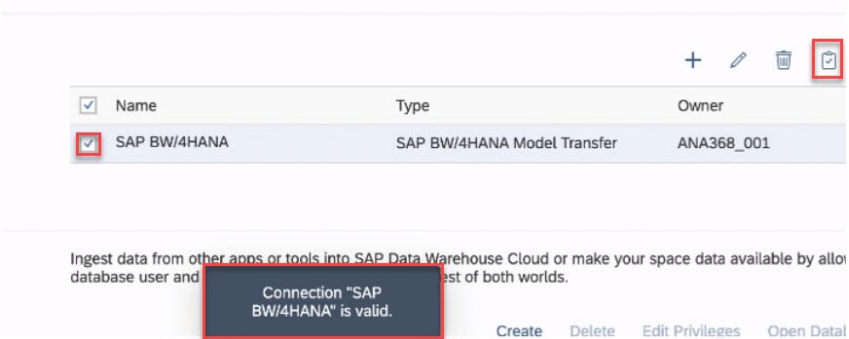

You will learn

- To log onto DWC
- To create a Space and assign yourself as a member of the Space
- Create an SAP BW/4HANA Model Transfer connection

Explanation	Screenshot
<p>1. Log onto DWC using the tenant link and user + password mentioned in the introduction.</p>	 <p>The screenshot shows the 'Log On' page. It has a title 'Log On' and two input fields: 'E-Mail or User Name' with the value 'saptechedana368+001@sap.com' and 'Password' with masked characters. There is a 'Remember me' checkbox and a blue 'Log On' button. A link 'Forgot password?' is at the bottom.</p>
<p>2. Once you are logged on, please go to <i>Space Management</i></p> <p>and create your first Space by clicking the + button.</p>	 <p>The screenshot shows the 'Space Management' dashboard. On the left is a sidebar with navigation links: Home, Files, Business Catalog, Story Builder, Business Builder, Data Builder, Data Access Control, and Data Integration Monitor. The main area shows a summary of spaces (8 total) and resource usage (Used Disk, Assigned Disk, Used In-Memory, Assigned In-Memory). A red box highlights a '+' button in the top right corner of the main area.</p>
<p>3. Please name the Space ANA368_XXX_IT where 'XXX' is your user number.</p>	 <p>The screenshot shows the 'Create Space' form. It has two input fields: 'Space Name: *' with the value 'ANA368_001_IT' and 'Space ID: * ?' with the value 'ANA368_001_IT'. At the bottom are 'Create' and 'Cancel' buttons.</p>
<p>4. Once the Space is created, please change the Storage Assignment under General Settings to the lowest possible option, as depicted here:</p> <p>This will be sufficient for this workshop.</p>	 <p>The screenshot shows the configuration page for space 'ANA368_001_IT'. It has tabs for Overview, Members, Connections, Database Access, Time Data, and Auditing. The 'General Settings' section shows 'Space ID' and 'Space Name' both set to 'ANA368_001_IT', and 'Space Status' set to 'Active'. The 'Storage Assignment' section has 'Disk (GB)' and 'In-Memory (GB)' both set to '0.1' with minus and plus buttons. The 'In-Memory Acceleration' section shows a progress indicator at '100 %'. A red box highlights the 'Storage Assignment' section.</p>

Explanation	Screenshot
<p>5. Save the changes .</p> <p>You should see a pop-up at the bottom confirming that the Space details have been updated.</p>	
<p>6. Under Member Assignment, please add your user by clicking the Add button.</p> <p>Search for your user and add it by marking it, and clicking Add.</p> <p>As the tenant is used for other TechEd workshops as well, please make sure that the user exactly matches your login user.</p> <p><i>[INFO] Whilst creating the material for this workshop, we sometimes experienced an error message when adding users. This is currently an open Bug. To work around this bug, please refresh (F5) the page after the error message has appeared, then the user should appear in the member list.</i></p>	
<p>7. Under Connections, create a connection of type SAP BW/4HANA Model Transfer by clicking the + button.</p>	

Explanation	Screenshot
8. In the first dialog box, select the connection type SAP BW/4HANA Model Transfer , either by scrolling down to it, or simply searching for <i>BW</i> in the search field.	 <p>The screenshot shows the 'Create Connection' dialog box at step 1, 'Choose your connection type'. A search bar at the top right contains the text 'BW'. Below the search bar, two connection types are listed: 'SAP BW' and 'SAP BW/4HANA Model Transfer'. The 'SAP BW/4HANA Model Transfer' option is highlighted with a red box. On the left side, there are filters for Features, Categories, and Sources. The 'Cancel' button is at the bottom right.</p>
9. In the second dialog box, give your connection a <i>Business Name</i> and a <i>Technical Name</i> , and choose the DP Agent dwcteched2020eu10 from the dropdown menu.	 <p>The screenshot shows the 'Create Connection' dialog box at step 2, 'Choose Connection Details'. The 'Business Name' field is filled with 'SAP BW/4HANA'. The 'Technical Name' field is filled with 'BW4'. The 'Description' field is empty. The 'Data Provisioning Agent' dropdown menu is set to 'dwcteched2020eu10'. The 'Next Step' and 'Cancel' buttons are at the bottom right.</p>

Explanation	Screenshot
<p>10. In the third dialog box, choose the BW4TEX connection under <i>SAC Tunnel Connection</i>.</p> <p>Change the value of <i>Validate Server Certificate</i> from true to false.</p> <p>Enter the following HANA Credentials:</p> <p>User: HDBUSER Passwd: Teched2020</p> <p>Click on <i>Create Connection</i>.</p>	
<p>11. Once the connection is created, validate it by marking it and clicking .</p> <p>This concludes the first exercise.</p>	

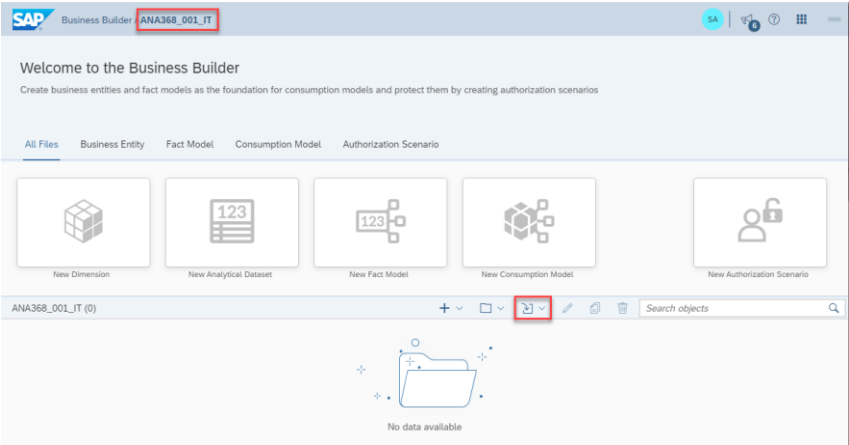

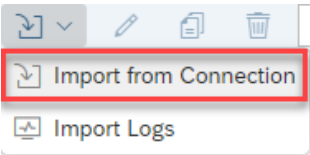

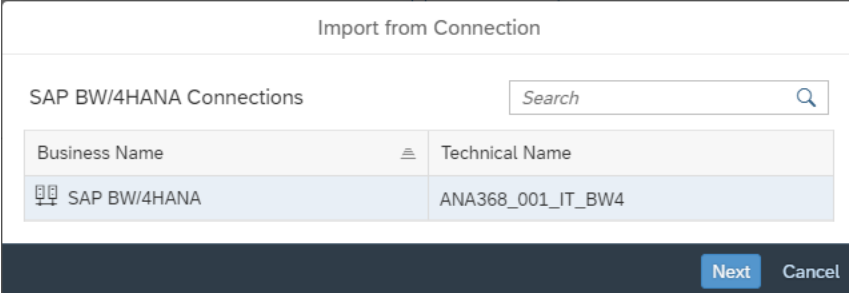

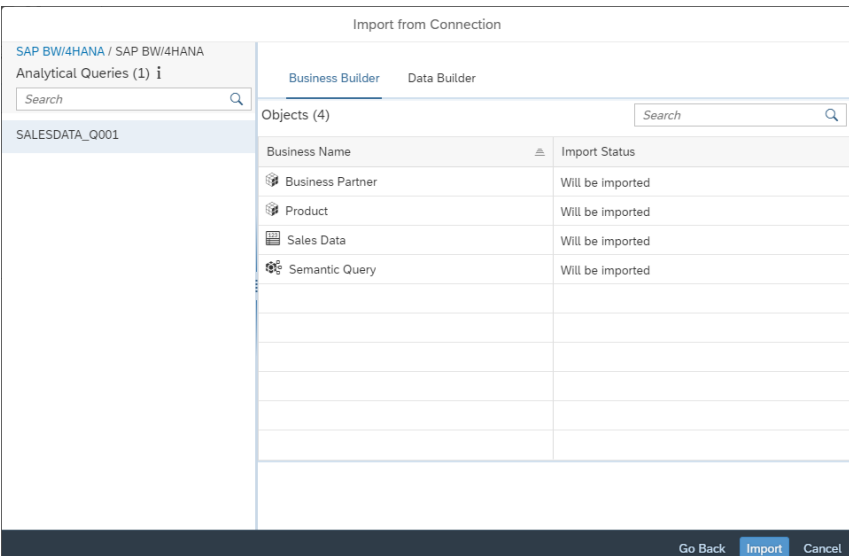

3. IMPORTING THE BW/4HANA DATA MODEL TO DWC

In this exercise, you will be importing the data model from the BW/4HANA system into your first DWC Space ANA368_XXX_IT.

Exercise Description

You will learn

- How to import a BW/4HANA data model into DWC using the *Import from Connection* function.

Explanation	Screenshot
<p>12. Making sure that you are in your newly created IT Space, please go to the <i>Business Builder</i> tab.</p> <p> Business Builder</p> <p>At the top you will see the navigation path, which should have your Space name.</p>	
<p>13. In the Business Builder, click on the  button, and choose <i>Import from Connection</i>.</p>	
<p>14. Mark the connection to BW/4HANA that you created in the previous exercise and click on <i>Next</i>.</p>	
<p>15. In the next screen, you should see just the BW Query SALESDATA_Q001. When you mark it, you will see the objects which will be imported to the Business Builder and the Data Builder.</p> <p>Click on <i>Import</i>.</p> <p>[INFO] In this step we have also observed sporadic error messages. If you get an error message, please click on Go Back, and try again.</p>	

Explanation	Screenshot																																																																	
<p>16. You should see a confirmation at the bottom of the screen, that the import has started.</p> <p>As well, you can see the progress of the import under the notifications at the top of the screen.</p>	<div>Batch deployment of 12 objects started.</div> <div><div>SAPTechED ANA368_001 SA</div><div><div><div>All Types</div><div>Search</div></div><div>Import of remote model SALESDATA_Q001 started 41 seconds ago</div></div></div>																																																																	
<p>17. Once the import has completed (it should not take more than a few minutes), you will see 4 files in the Business Builder, and 8 files in the Data Builder.</p> <p>You have now successfully imported the data model from BW/4HANA into DWC.</p>	<div>ANA368_001_IT (4)</div> <table><tr><th></th><th>Business Name</th><th>Type</th><th>Created By</th></tr><tr><td></td><td>Business Partner</td><td>Dimension (Business Entity)</td><td>SAPTechED ANA368_001</td></tr><tr><td></td><td>Product</td><td>Dimension (Business Entity)</td><td>SAPTechED ANA368_001</td></tr><tr><td></td><td>Sales Data</td><td>Analytical Dataset (Business Entity)</td><td>SAPTechED ANA368_001</td></tr><tr><td></td><td>Semantic Query</td><td>Consumption Model</td><td>SAPTechED ANA368_001</td></tr></table> <div>Files (8)</div> <table><tr><th></th><th>Business Name</th><th>Technical Name</th><th>Type</th><th>Created By</th></tr><tr><td></td><td>/BIC/MPARTNERID</td><td>BICMPARTNERID</td><td>Remote Table</td><td>SAPTechED ANA368_001</td></tr><tr><td></td><td>/BIC/MPRODUCT</td><td>BICMPRODUCT</td><td>Remote Table</td><td>SAPTechED ANA368_001</td></tr><tr><td></td><td>/BIC/TPRODUCT</td><td>BICTPRODUCT</td><td>Remote Table</td><td>SAPTechED ANA368_001</td></tr><tr><td></td><td>Sales Data</td><td>BICVSALESDATA8</td><td>Remote Table</td><td>SAPTechED ANA368_001</td></tr><tr><td></td><td>DLPARTNERID</td><td>DLPARTNERID</td><td>Dimension (View)</td><td>SAPTechED ANA368_001</td></tr><tr><td></td><td>Product</td><td>PRODUCT__T</td><td>View</td><td>SAPTechED ANA368_001</td></tr><tr><td></td><td>DLPRODUCT</td><td>DLPRODUCT</td><td>Dimension (View)</td><td>SAPTechED ANA368_001</td></tr><tr><td></td><td>Product</td><td>TAPRODUCT</td><td>Dimension (View)</td><td>SAPTechED ANA368_001</td></tr></table>		Business Name	Type	Created By		Business Partner	Dimension (Business Entity)	SAPTechED ANA368_001		Product	Dimension (Business Entity)	SAPTechED ANA368_001		Sales Data	Analytical Dataset (Business Entity)	SAPTechED ANA368_001		Semantic Query	Consumption Model	SAPTechED ANA368_001		Business Name	Technical Name	Type	Created By		/BIC/MPARTNERID	BICMPARTNERID	Remote Table	SAPTechED ANA368_001		/BIC/MPRODUCT	BICMPRODUCT	Remote Table	SAPTechED ANA368_001		/BIC/TPRODUCT	BICTPRODUCT	Remote Table	SAPTechED ANA368_001		Sales Data	BICVSALESDATA8	Remote Table	SAPTechED ANA368_001		DLPARTNERID	DLPARTNERID	Dimension (View)	SAPTechED ANA368_001		Product	PRODUCT__T	View	SAPTechED ANA368_001		DLPRODUCT	DLPRODUCT	Dimension (View)	SAPTechED ANA368_001		Product	TAPRODUCT	Dimension (View)	SAPTechED ANA368_001

4. CREATING THE SECOND SPACE (LOB SPACE)

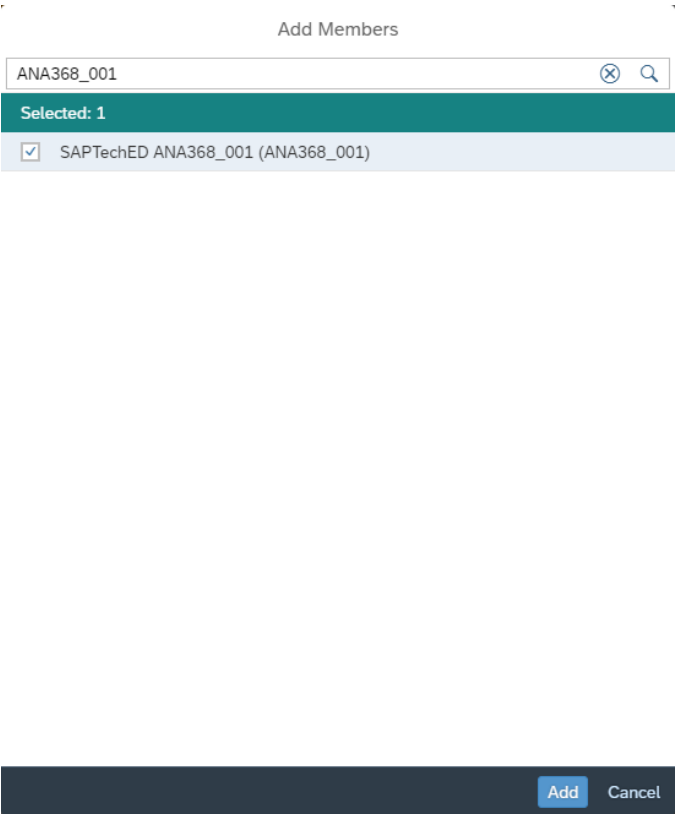

In this exercise, you will create a second Space for importing other sales data residing in flat files, which will later be combined with the data that you imported from BW/4HANA to complete the hybrid scenario.

Exercise Description

You will learn

- To create a DWC Space.

Explanation	Screenshot
<p>18. In this short exercise, you will create an LoB Space which will be used to combine data with your IT Space containing the BW/4HANA Data.</p> <p>Please again go to Space Management, and click the  button to create a new Space. If you are in your IT Space, you can return to the Space overview by using the breadcrumbs at the top left of the screen.</p> <p>Please name this second Space ANA368_XXX_LoB, where 'XXX' is your workshop user number.</p>	
<p>19. Please also lower the storage assignment in this Space and click the  button to save.</p>	

Explanation	Screenshot
<p>20. Under Members, add your user as a member by selecting it and clicking <i>Add</i>. Again, please double check to make sure that you have the exact user that you are logged in with.</p> <p>You now have your second Space for importing flat files.</p>	

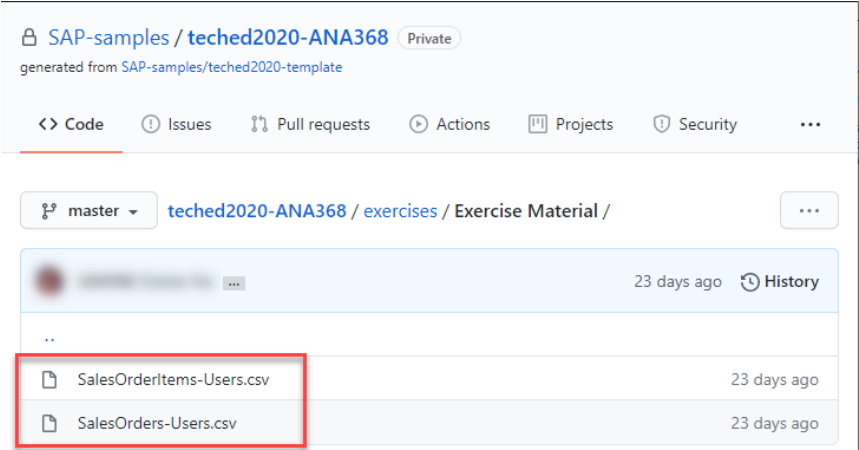

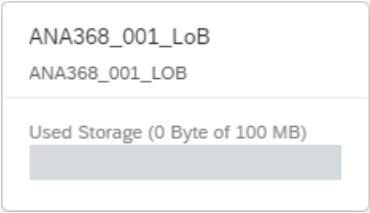

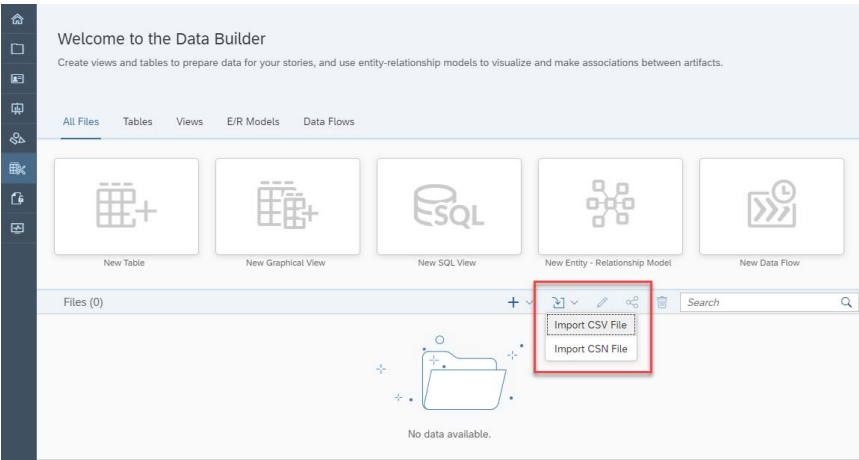

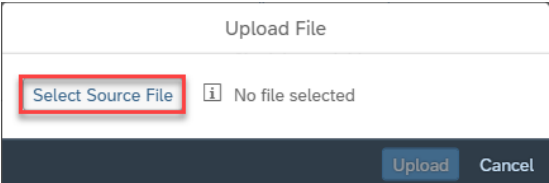

5. IMPORTING ADDITIONAL SALES DATA VIA FLAT FILE IMPORT

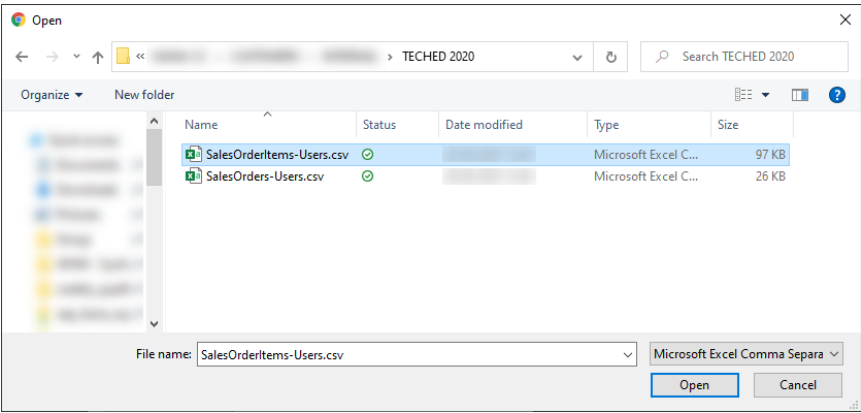

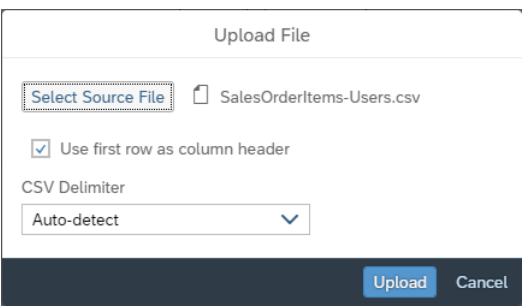

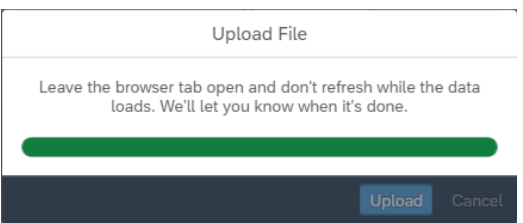

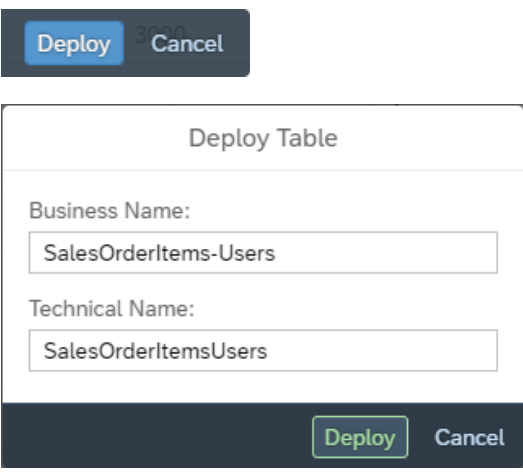

In this exercise, you will import two flat files to your LoB Space that you just created.

Exercise Description

You will learn

- To add flat files to a Space using the Data Builder.

Explanation	Screenshot
<p>21. Please go to the provided GitHub page for this workshop (teched2020-ANA368) and download the two CSV files from the <i>Exercise Material</i> folder:</p> <p><i>SalesOrderItems-Users.csv</i></p> <p><i>SalesOrders-Users.csv</i></p>	 <p>SAP-samples / teched2020-ANA368 (Private) generated from SAP-samples/teched2020-template</p> <p><> Code ⓘ Issues 🔗 Pull requests ▶ Actions 📁 Projects 🛡 Security ⋮</p> <p>master ▼ teched2020-ANA368 / exercises / Exercise Material /</p> <p>23 days ago History</p> <p>..</p> <p>📄 SalesOrderItems-Users.csv 23 days ago</p> <p>📄 SalesOrders-Users.csv 23 days ago</p>
<p>22. Back in DWC, please go to the <i>Data Builder</i>.</p> <p> Data Builder</p> <p>In the Data Builder, make sure that you choose your LoB Space.</p>	 <p>ANA368_001_LoB ANA368_001_LOB</p> <p>Used Storage (0 Byte of 100 MB)</p>
<p>23. In your LoB Space, click the  button, and choose <i>Import CSV File</i>.</p>	 <p>Welcome to the Data Builder Create views and tables to prepare data for your stories, and use entity-relationship models to visualize and make associations between artifacts.</p> <p>All Files Tables Views E/R Models Data Flows</p> <p>New Table New Graphical View New SQL View New Entity - Relationship Model New Data Flow</p> <p>Files (0) +</p> <p>Import CSV File Import CSN File</p> <p>No data available.</p>
<p>24. Click <i>Select Source File</i> in the pop-up.</p>	 <p>Upload File</p> <p>Select Source File ⓘ No file selected</p> <p>Upload Cancel</p>

Explanation	Screenshot
<p>25. Choose the first file from the directory where you downloaded it to.</p> <p>Click on <i>Open</i>.</p>	
<p>26. Leave the default options and click on <i>Upload</i>.</p>	
<p>27. You will get a progress for the upload.</p>	
<p>28. Once the data has loaded, a preview will be displayed and you will get the option to deploy the table.</p> <p>Click on <i>Deploy</i> at the bottom of the screen.</p> <p>Leave the default Business Name and Technical Name, and click on <i>Deploy</i> again in the pop-up.</p>	

Explanation	Screenshot																																												
29. While the file deploys, you will see the following pop-up at the bottom of your screen.	<div>SalesOrderItemsUsers deployment started. You will get notified once the process finalized.</div>																																												
30. Once the deployment has completed, you will see the file in the list in the Data Builder.	<table><tr><th colspan="7">Files (1)</th><th>+</th><th>▼</th><th>✎</th><th>🔗</th><th>🗑</th><th>Search</th><th>🔍</th></tr><tr><th><input type="checkbox"/></th><th>Business Name</th><th>Technical Name</th><th>Type</th><th>Created By</th><th>Created On</th><th>Changed By</th><th>Changed On</th><th colspan="6"></th></tr><tr><td><input type="checkbox"/></td><td> SalesOrderItems-Users</td><td>SalesOrderItemsUs...</td><td>Relational Dataset (Local Table)</td><td>SAPTechED ANA368_001</td><td></td><td>SAPTechED ANA368_001</td><td></td><td colspan="6"></td></tr></table>	Files (1)							+	▼	✎	🔗	🗑	Search	🔍	<input type="checkbox"/>	Business Name	Technical Name	Type	Created By	Created On	Changed By	Changed On							<input type="checkbox"/>	 SalesOrderItems-Users	SalesOrderItemsUs... 6. BUILD THE FIRST STORY IN THE IT SPACE

In this exercise, you will use the data available in your IT Space coming from BW/4HANA to create a simple overview of the gross amount of sales per product that you have.

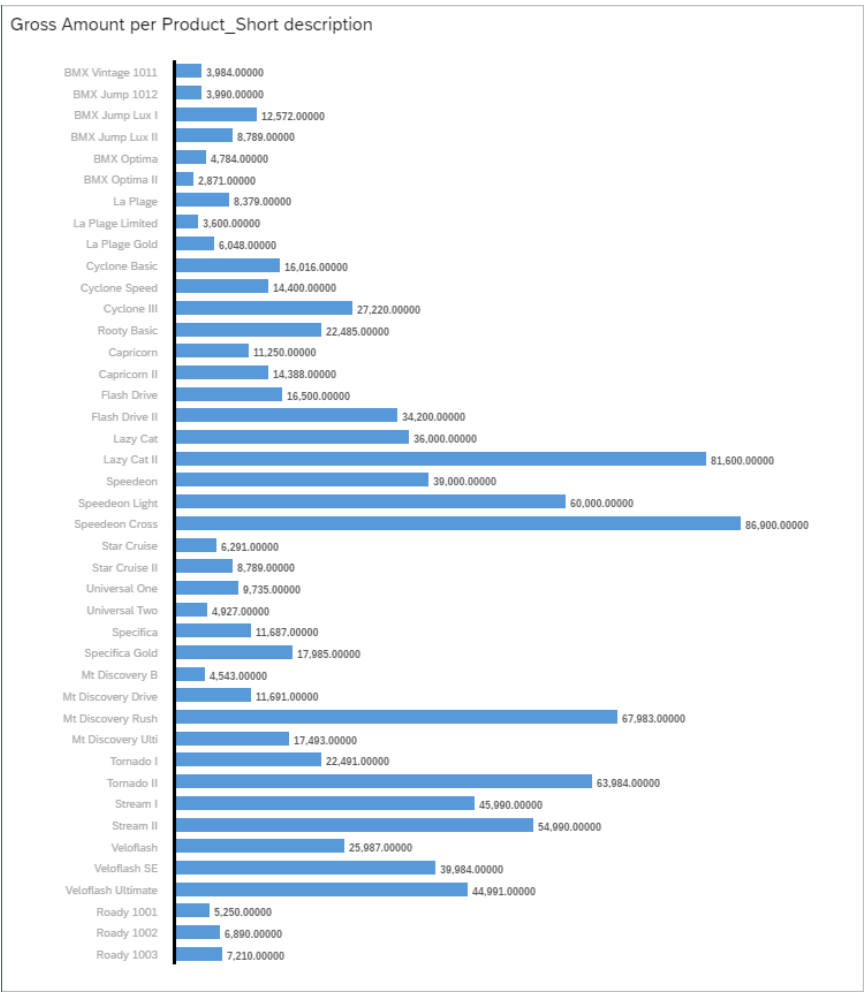

Exercise Description

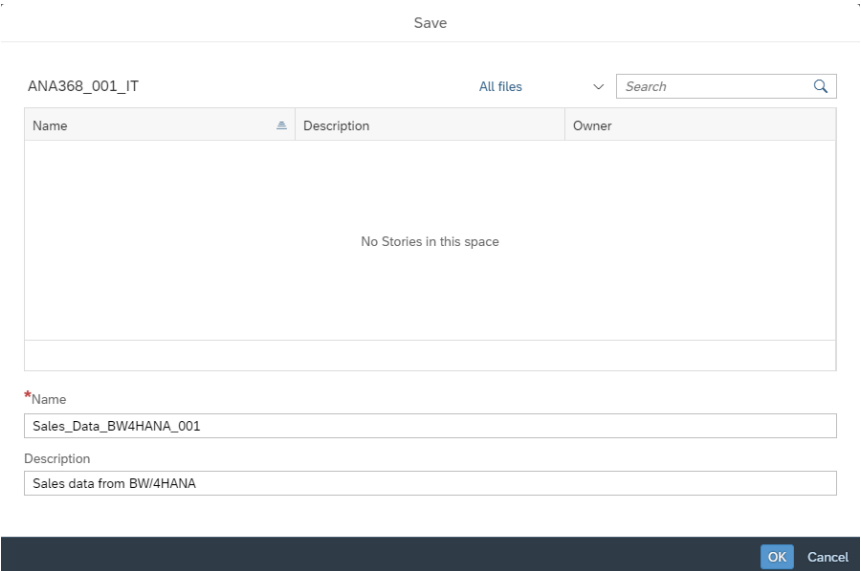

You will learn

- To create a simple Story in DWC.

Explanation	Screenshot
<p>32. Go to the Story Builder and choose your IT Space.</p> <p>If you are still in your LoB Space, change to your IT Space by clicking on <i>Story Builder</i> in the breadcrumbs at the top left of the screen.</p> <p>Click on <i>Create Story</i>.</p>	
<p>33. In the pop-up, use the arrow to choose the consumption model SALESDATA_Q001.</p> <p>Then click on <i>OK</i>.</p>	
<p>34. You will see on the left side, that you have added SALESDATA_Q001 to the story.</p>	

Explanation	Screenshot
<p>35. To build the first Story, please choose the object <i>Chart</i>.</p>	<p>Add an object to the story canvas.</p> 
<p>36. On the right, in the Designer, please click + Add Measure to add the Measure <i>Gross Amount</i>.</p> <p>Please click on + Add Dimension to add the Dimension <i>Product_Short description</i>.</p>	

Explanation	Screenshot																																																																																						
<p>37. You can manipulate the size of the chart by pulling it larger on the canvas.</p> <p>If everything has worked as expected, you should have the following chart in your Story.</p> <p>You have now built your first Story.</p>	 <p>Gross Amount per Product_Short description</p> <table border="1"> <thead> <tr> <th>Product_Short description</th> <th>Gross Amount</th> </tr> </thead> <tbody> <tr><td>BMX Vintage 1011</td><td>3,984.00000</td></tr> <tr><td>BMX Jump 1012</td><td>3,990.00000</td></tr> <tr><td>BMX Jump Lux I</td><td>12,572.00000</td></tr> <tr><td>BMX Jump Lux II</td><td>8,789.00000</td></tr> <tr><td>BMX Optima</td><td>4,784.00000</td></tr> <tr><td>BMX Optima II</td><td>2,871.00000</td></tr> <tr><td>La Plage</td><td>8,379.00000</td></tr> <tr><td>La Plage Limited</td><td>3,600.00000</td></tr> <tr><td>La Plage Gold</td><td>6,048.00000</td></tr> <tr><td>Cyclone Basic</td><td>16,016.00000</td></tr> <tr><td>Cyclone Speed</td><td>14,400.00000</td></tr> <tr><td>Cyclone III</td><td>27,220.00000</td></tr> <tr><td>Rooty Basic</td><td>22,485.00000</td></tr> <tr><td>Capricorn</td><td>11,250.00000</td></tr> <tr><td>Capricorn II</td><td>14,388.00000</td></tr> <tr><td>Flash Drive</td><td>16,500.00000</td></tr> <tr><td>Flash Drive II</td><td>34,200.00000</td></tr> <tr><td>Lazy Cat</td><td>36,000.00000</td></tr> <tr><td>Lazy Cat II</td><td>81,600.00000</td></tr> <tr><td>Speedeon</td><td>39,000.00000</td></tr> <tr><td>Speedeon Light</td><td>60,000.00000</td></tr> <tr><td>Speedeon Cross</td><td>86,900.00000</td></tr> <tr><td>Star Cruise</td><td>6,291.00000</td></tr> <tr><td>Star Cruise II</td><td>8,789.00000</td></tr> <tr><td>Universal One</td><td>9,735.00000</td></tr> <tr><td>Universal Two</td><td>4,927.00000</td></tr> <tr><td>Specifica</td><td>11,687.00000</td></tr> <tr><td>Specifica Gold</td><td>17,985.00000</td></tr> <tr><td>Mt Discovery B</td><td>4,543.00000</td></tr> <tr><td>Mt Discovery Drive</td><td>11,691.00000</td></tr> <tr><td>Mt Discovery Rush</td><td>67,983.00000</td></tr> <tr><td>Mt Discovery Ulti</td><td>17,493.00000</td></tr> <tr><td>Tornado I</td><td>22,491.00000</td></tr> <tr><td>Tornado II</td><td>63,984.00000</td></tr> <tr><td>Stream I</td><td>45,990.00000</td></tr> <tr><td>Stream II</td><td>54,990.00000</td></tr> <tr><td>Veloflash</td><td>25,987.00000</td></tr> <tr><td>Veloflash SE</td><td>39,984.00000</td></tr> <tr><td>Veloflash Ultimate</td><td>44,991.00000</td></tr> <tr><td>Roady 1001</td><td>5,250.00000</td></tr> <tr><td>Roady 1002</td><td>6,890.00000</td></tr> <tr><td>Roady 1003</td><td>7,210.00000</td></tr> </tbody> </table>	Product_Short description	Gross Amount	BMX Vintage 1011	3,984.00000	BMX Jump 1012	3,990.00000	BMX Jump Lux I	12,572.00000	BMX Jump Lux II	8,789.00000	BMX Optima	4,784.00000	BMX Optima II	2,871.00000	La Plage	8,379.00000	La Plage Limited	3,600.00000	La Plage Gold	6,048.00000	Cyclone Basic	16,016.00000	Cyclone Speed	14,400.00000	Cyclone III	27,220.00000	Rooty Basic	22,485.00000	Capricorn	11,250.00000	Capricorn II	14,388.00000	Flash Drive	16,500.00000	Flash Drive II	34,200.00000	Lazy Cat	36,000.00000	Lazy Cat II	81,600.00000	Speedeon	39,000.00000	Speedeon Light	60,000.00000	Speedeon Cross	86,900.00000	Star Cruise	6,291.00000	Star Cruise II	8,789.00000	Universal One	9,735.00000	Universal Two	4,927.00000	Specifica	11,687.00000	Specifica Gold	17,985.00000	Mt Discovery B	4,543.00000	Mt Discovery Drive	11,691.00000	Mt Discovery Rush	67,983.00000	Mt Discovery Ulti	17,493.00000	Tornado I	22,491.00000	Tornado II	63,984.00000	Stream I	45,990.00000	Stream II	54,990.00000	Veloflash	25,987.00000	Veloflash SE	39,984.00000	Veloflash Ultimate	44,991.00000	Roady 1001	5,250.00000	Roady 1002	6,890.00000	Roady 1003	7,210.00000

Explanation	Screenshot
<div>38. Save your Story as Sales_Data_BW4HANA_XXX</div> <div>We will compare this story to a story in a later exercise, where we have the same input, but the underlying data from BW/4HANA has been combined with additional data from our CSV file upload in the LoB Space.</div>	

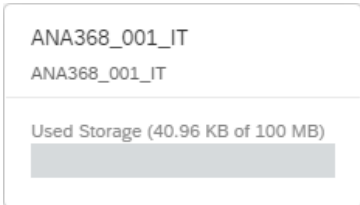

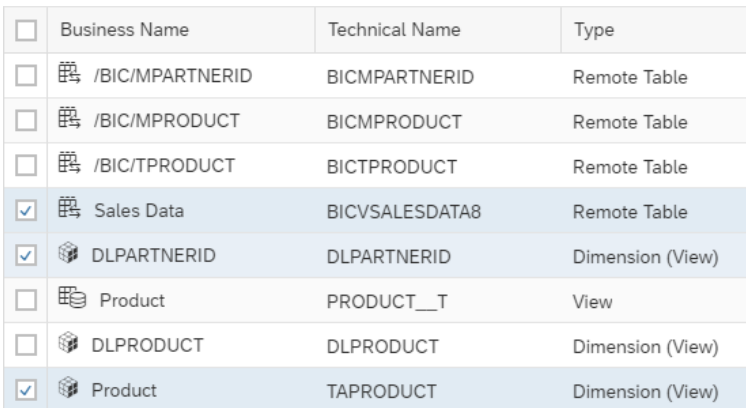

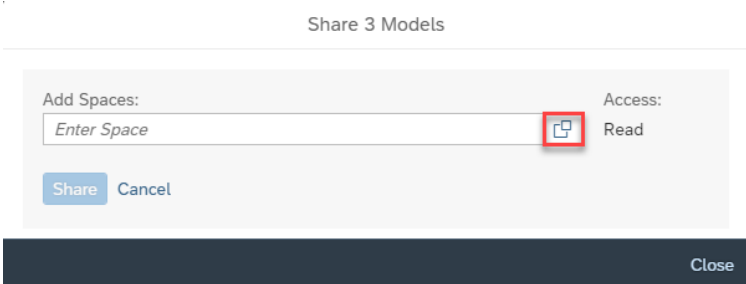

7. COMBINING DATA FROM SPACES TO VISUALIZE DATA IN SAC

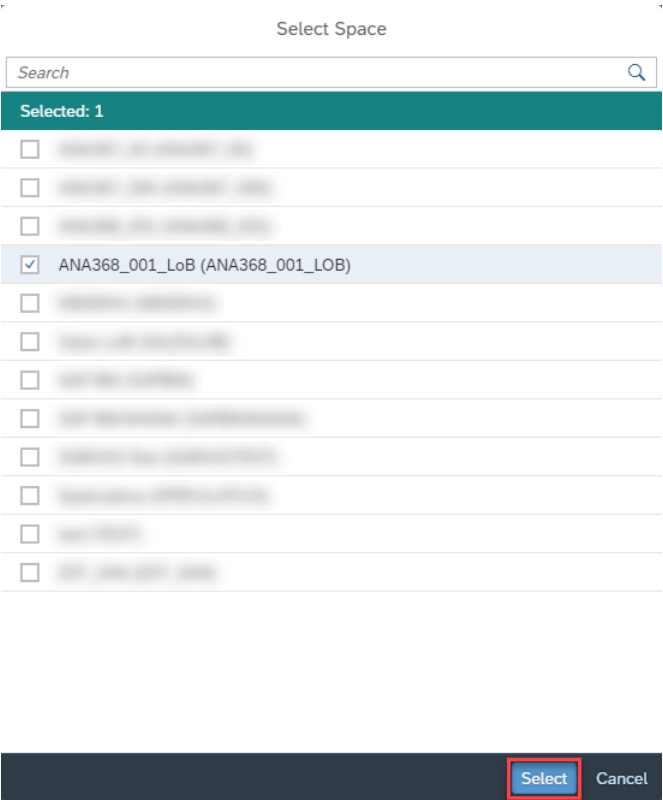

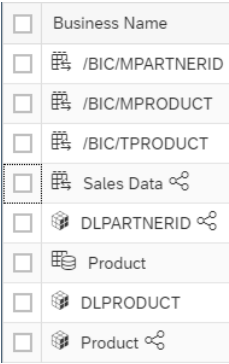

In this exercise, you will be combining the data from the IT Space with the data from the LoB Space by exposing a subset of the data in the IT Space to the LoB Space.

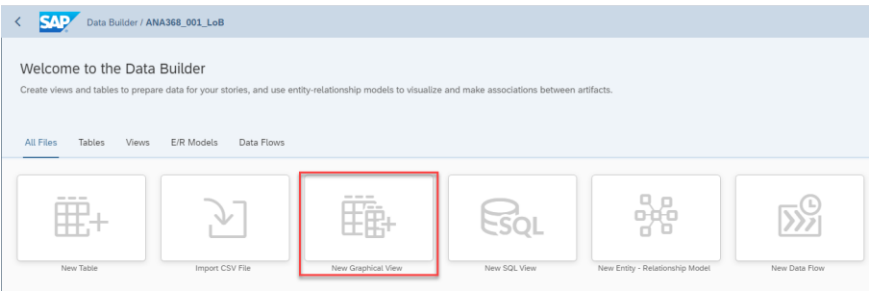

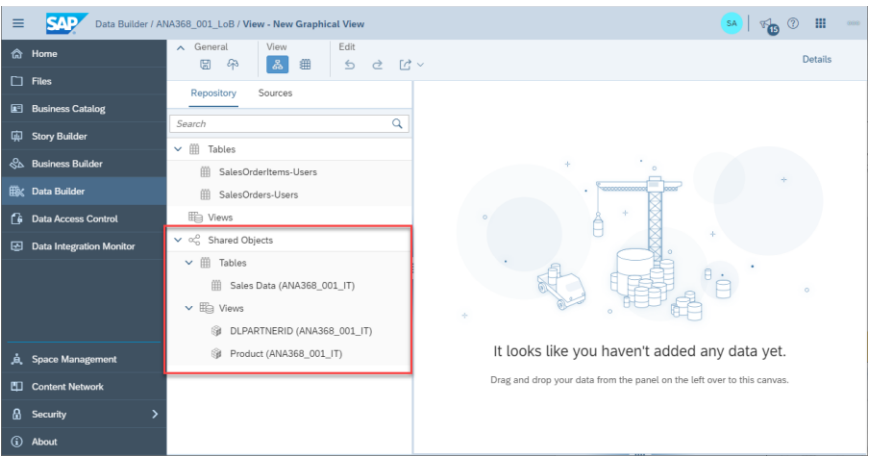

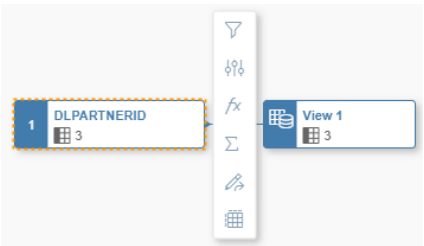

Exercise Description

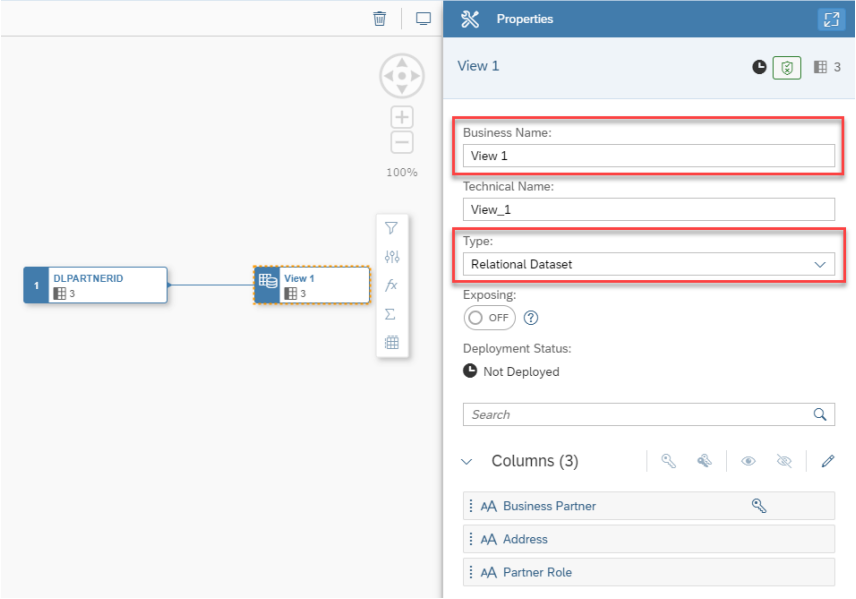

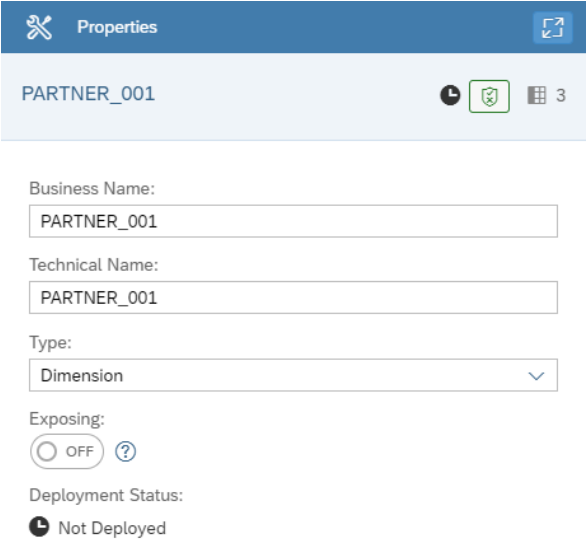

You will learn

- To share data between Spaces
- Building a data model with combined data from two Spaces
- Creating a Story with the combined model

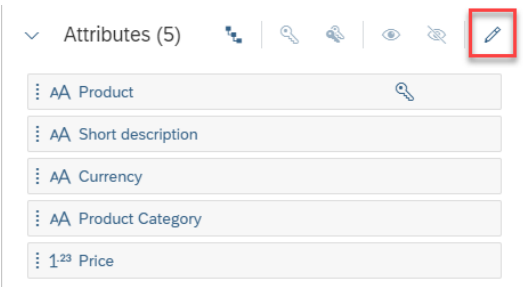

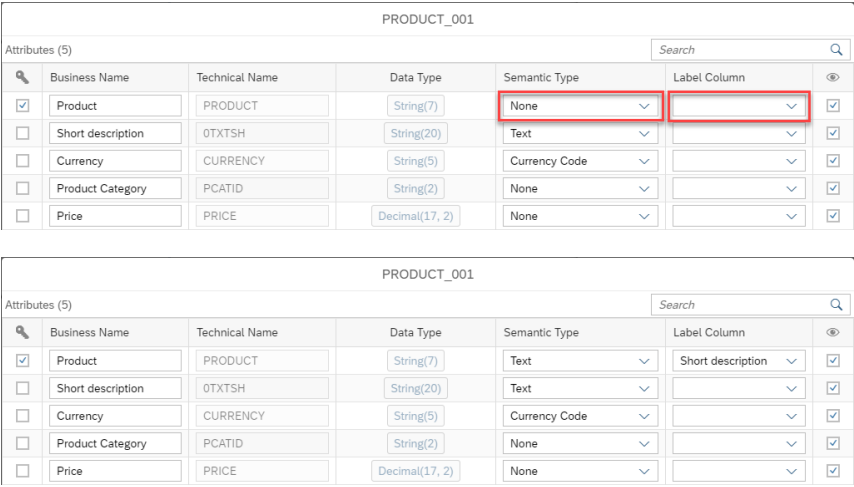

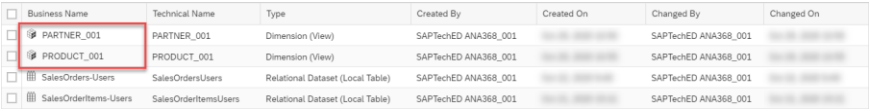

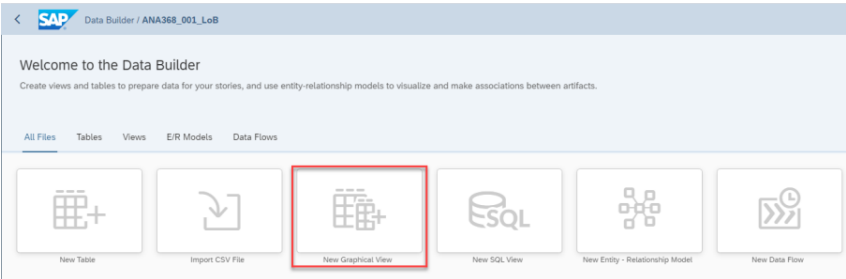

Explanation	Screenshot																																				
39. Go to the Data Builder and choose your IT Space.																																					
40. In the Data Builder for your IT Space, you see your 8 files under <i>All Files</i> in the initial view. (The files may appear in a different order). Mark the following: Sales Data DLPARTNERID Product (TAPRODUCT) As there are two files with the name <i>Product</i> , make sure to check the technical name.	 <table><thead><tr><th><input type="checkbox"/></th><th>Business Name</th><th>Technical Name</th><th>Type</th></tr></thead><tbody><tr><td><input type="checkbox"/></td><td>/BIC/MPARTNERID</td><td>BICMPARTNERID</td><td>Remote Table</td></tr><tr><td><input type="checkbox"/></td><td>/BIC/MPRODUCT</td><td>BICMPRODUCT</td><td>Remote Table</td></tr><tr><td><input type="checkbox"/></td><td>/BIC/TPRODUCT</td><td>BICTPRODUCT</td><td>Remote Table</td></tr><tr><td><input checked="" type="checkbox"/></td><td>Sales Data</td><td>BICVSALESDATA8</td><td>Remote Table</td></tr><tr><td><input checked="" type="checkbox"/></td><td>DLPARTNERID</td><td>DLPARTNERID</td><td>Dimension (View)</td></tr><tr><td><input type="checkbox"/></td><td>Product</td><td>PRODUCT__T</td><td>View</td></tr><tr><td><input type="checkbox"/></td><td>DLPRODUCT</td><td>DLPRODUCT</td><td>Dimension (View)</td></tr><tr><td><input checked="" type="checkbox"/></td><td>Product</td><td>TAPRODUCT</td><td>Dimension (View)</td></tr></tbody></table>	<input type="checkbox"/>	Business Name	Technical Name	Type	<input type="checkbox"/>	/BIC/MPARTNERID	BICMPARTNERID	Remote Table	<input type="checkbox"/>	/BIC/MPRODUCT	BICMPRODUCT	Remote Table	<input type="checkbox"/>	/BIC/TPRODUCT	BICTPRODUCT	Remote Table	<input checked="" type="checkbox"/>	Sales Data	BICVSALESDATA8	Remote Table	<input checked="" type="checkbox"/>	DLPARTNERID	DLPARTNERID	Dimension (View)	<input type="checkbox"/>	Product	PRODUCT__T	View	<input type="checkbox"/>	DLPRODUCT	DLPRODUCT	Dimension (View)	<input checked="" type="checkbox"/>	Product	TAPRODUCT	Dimension (View)
<input type="checkbox"/>	Business Name	Technical Name	Type																																		
<input type="checkbox"/>	/BIC/MPARTNERID	BICMPARTNERID	Remote Table																																		
<input type="checkbox"/>	/BIC/MPRODUCT	BICMPRODUCT	Remote Table																																		
<input type="checkbox"/>	/BIC/TPRODUCT	BICTPRODUCT	Remote Table																																		
<input checked="" type="checkbox"/>	Sales Data	BICVSALESDATA8	Remote Table																																		
<input checked="" type="checkbox"/>	DLPARTNERID	DLPARTNERID	Dimension (View)																																		
<input type="checkbox"/>	Product	PRODUCT__T	View																																		
<input type="checkbox"/>	DLPRODUCT	DLPRODUCT	Dimension (View)																																		
<input checked="" type="checkbox"/>	Product	TAPRODUCT	Dimension (View)																																		
41. With the files marked, click on the  button next to the search bar to share them. In the pop-up, click the select button.																																					

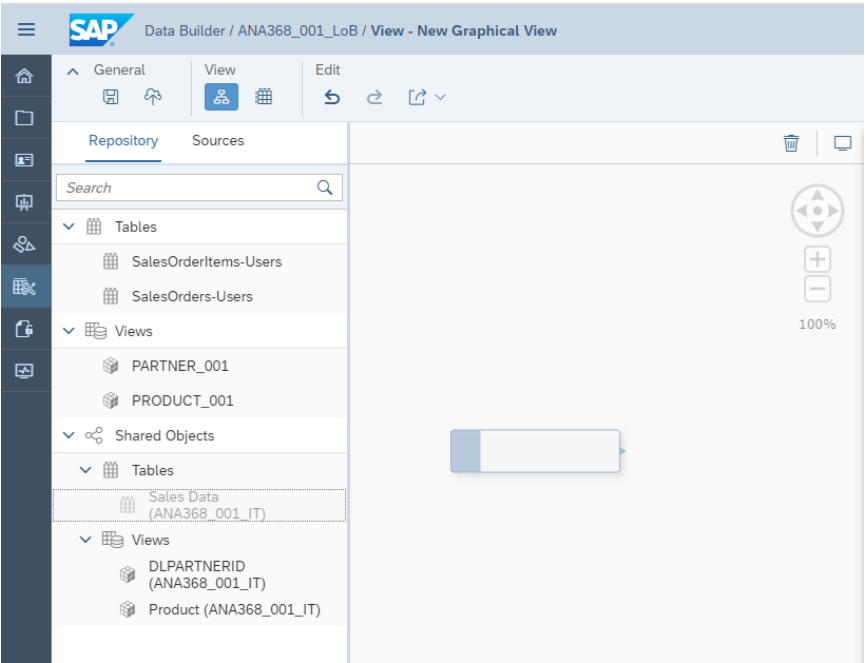

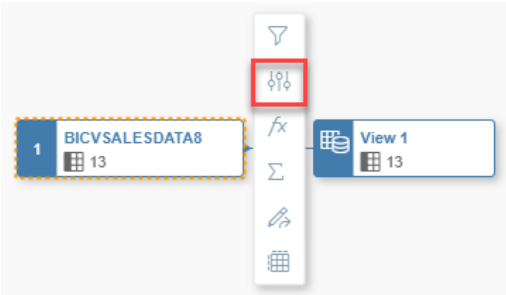

Explanation	Screenshot
<p>42. Choose your LoB Space and click on <i>Select</i>.</p> <p>If you later do not see the files shared in your LoB Space, you have most likely shared them with an incorrect Space, so do take a second to check that you have the right Space.</p>	
<p>43. Click on <i>Share</i>.</p> <p>You will get a confirmation that your models were shared successfully at the bottom of the screen.</p> <p>After this, you can close the <i>Share 3 Models</i> pop-up.</p>	
<p>44. In the file overview, you can now see a  after the files which you have shared.</p> <p>If you click on  you can see which Spaces the files have been shared with.</p>	

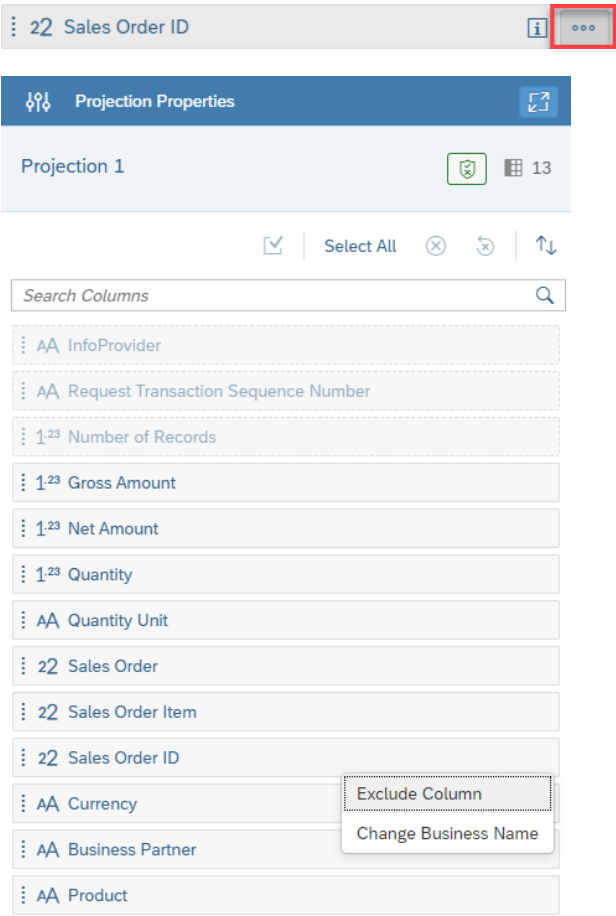

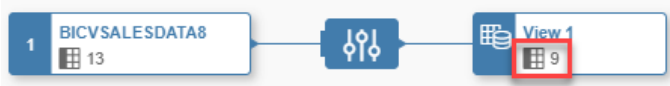

Explanation	Screenshot
<p>45. In the Data Builder, change to your LoB Space.</p> <p>Click on <i>New Graphical View</i>.</p> <p><i>[Info] The tile to import CSV file has been moved, so do not worry if the Data Builder looks slightly different than in this screenshot.</i></p>	
<p>46. You should be able to see your new objects under <i>Shared Objects</i> when you expand the <i>Repository</i> list.</p> <p>The first part of this exercise is done; you have successfully shared objects between two DWC Spaces.</p> <p>Stay here in the Graphical View builder.</p>	
<p>47. First, you will create two dimension views (for Partner and Product) which will later be added as associations to the main view that you will be using to build your sales data Story with.</p> <p>Start by dragging and dropping the shared view DLPARTNERID onto the canvas.</p>	

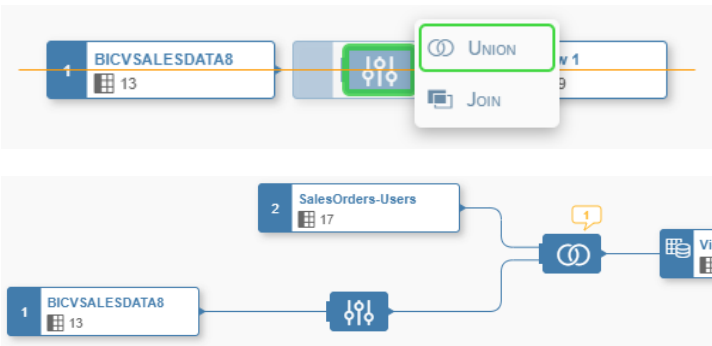

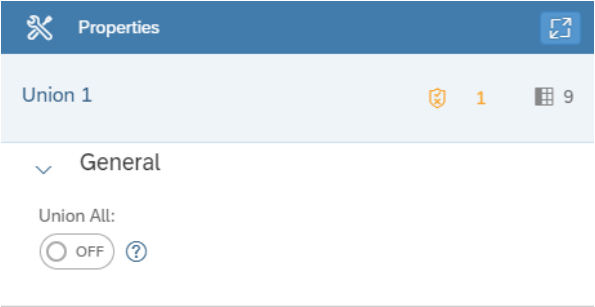

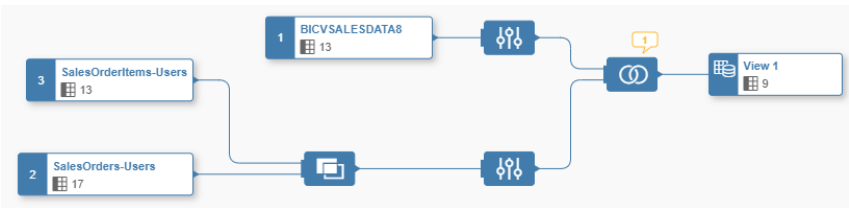

Explanation	Screenshot
<p>48. Mark the View (view 1) and change the Properties <i>Business Name</i> and <i>Type</i> as described in the next step.</p> <p>[Info] In case the <i>Properties</i> screen on the right does not open automatically, you can open it by clicking <i>Details</i> at the top right.</p>	
<p>49. As <i>Business Name</i>, please enter PARTNER_XXX, where XXX is your workshop user number.</p> <p>As <i>Type</i>, please choose Dimension.</p>	

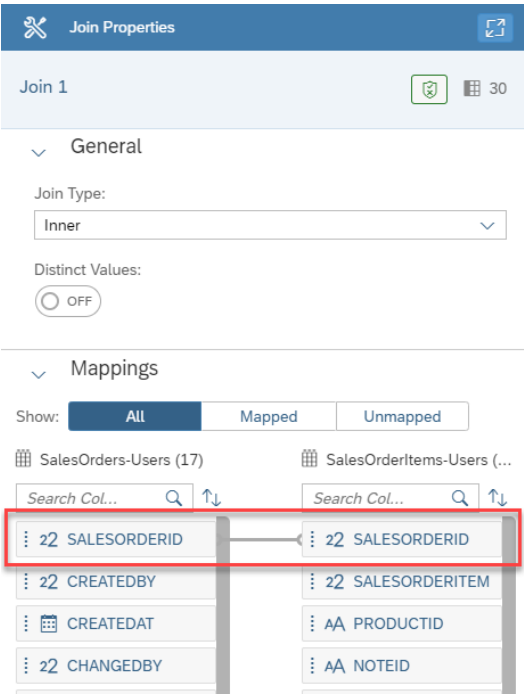

Explanation	Screenshot
<p>50. Deploy the View by clicking the  button, which you will find in the top left corner under <i>General</i>.</p> <p>In the pop-up, click <i>Save</i>.</p> <p>You can see when the deployment is successful in the notifications at the top.</p>	<div><div><div>Save View</div><div><div>Business Name:</div><div>PARTNER_001</div></div><div><div>Technical Name:</div><div>PARTNER_001</div></div><div><div>Save</div><div>Cancel</div></div></div><div><div>Deploying PARTNER_001. We will notify you when the process is complete.</div></div><div><div>SAPTechED ANA368_001 SA</div><div>16</div><div>?</div><div></div></div><div><div>All Types</div><div>Search</div><div></div></div><div><div><input checked="" type="checkbox"/> The deployment of PARTNER_001 was successful.</div><div>Open configuration of PARTNER_001.</div><div>10 seconds ago</div><div></div></div></div>
<p>51. Please repeat the above steps for your second dimension, by using the breadcrumbs at the top to go back to the overview in your LoB Space Data Builder.</p> <p>Steps: Click on <i>New Graphical View</i>. In the View Builder, under <i>Shared Objects</i>, find the TAPRODUCT view and drag it onto the canvas. Mark the view (view 1). Change the <i>Business Name</i> to PRODUCT_XXX. Change the <i>Type</i> to Dimension.</p>	<div><div><div>100%</div><div><div>1</div><div>TAPRODUCT</div><div>5</div></div><div><div>PRODUCT_001</div><div>5</div></div></div><div><div>Properties</div><div>PRODUCT_001</div><div>5</div></div><div><div>Business Name:</div><div>PRODUCT_001</div></div><div><div>Technical Name:</div><div>PRODUCT_001</div></div><div><div>Type:</div><div>Dimension</div></div><div><div>Exposing:</div><div><input type="radio"/> OFF</div></div><div><div>Deployment Status:</div><div>Not Deployed</div></div></div>

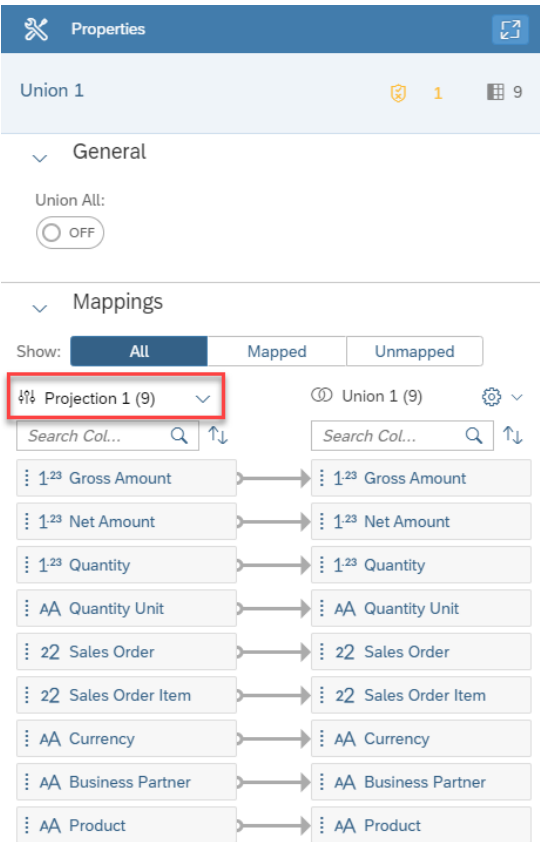

Explanation	Screenshot
52. For PRODUCT_XXX, please also edit the Attributes in the properties by clicking the edit button.	
<p>53. In the Attribute pop-up, please change the <i>Semantic Type</i> for Product to Text, and the <i>Label Column</i> to Short Description.</p> <p>This way, we can see the descriptions of the products in our Story later.</p> <p>After this, please deploy the Dimension as you did for Partner.</p>	
54. You can now see your two new Dimension Views in the Data Builder overview.	
<p>55. Still in the Data Builder for your LoB Space, click on New Graphical View.</p> <p>This view will combine the sales data that we imported into the LoB Space via flat file, with the sales data that we imported into our IT Space via BW/4HANA Model Transfer. The view will also take advantage of our two Dimension views by adding them as Associations.</p>	

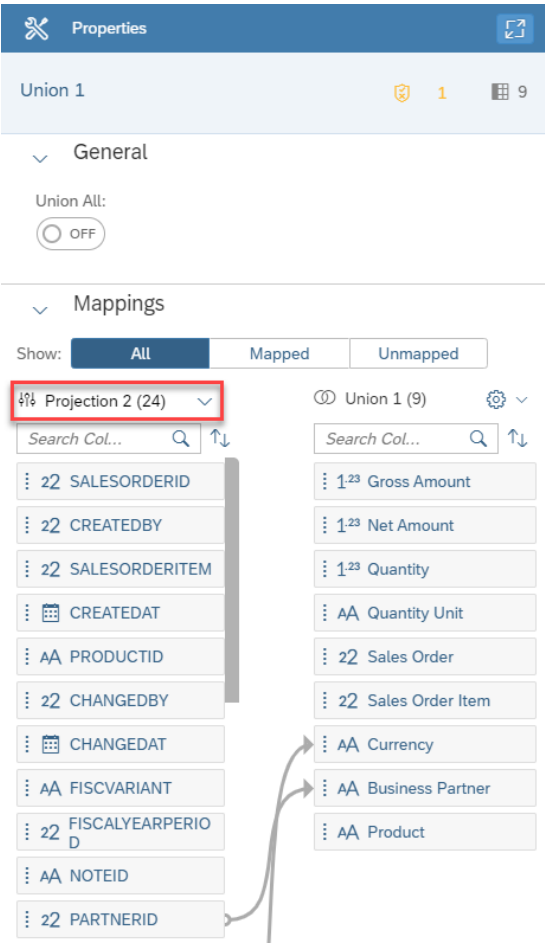

Explanation	Screenshot
<p>56. Drag and drop the <i>Sales Data</i> (<i>ANA368_XXX_IT</i>) table onto the canvas. You will also find this table under <i>Shared Objects</i>.</p>	 <p>The screenshot shows the SAP Data Builder interface for 'ANA368_001_LoB / View - New Graphical View'. The left pane is divided into 'Repository' and 'Sources'. Under 'Repository', there are sections for 'Tables', 'Views', and 'Shared Objects'. The 'Shared Objects' section is expanded, showing a list of objects including 'Sales Data (ANA368_001_IT)', which is highlighted. The right pane shows a blank canvas with a small blue rectangle and a zoom control set to 100%.</p>
<p>57. Mark the Sales Data table (<i>BICVSALESDATA8</i>) that you dragged onto the canvas and click on  to create a projection.</p>	 <p>The screenshot shows a graphical view canvas with two objects: 'BICVSALESDATA8' (a table with 13 rows) and 'View 1' (a view with 13 rows). A vertical toolbar is positioned between them, with the projection icon (a circle with three dots) highlighted in a red box. The projection icon is used to create a projection from the table to the view.</p>

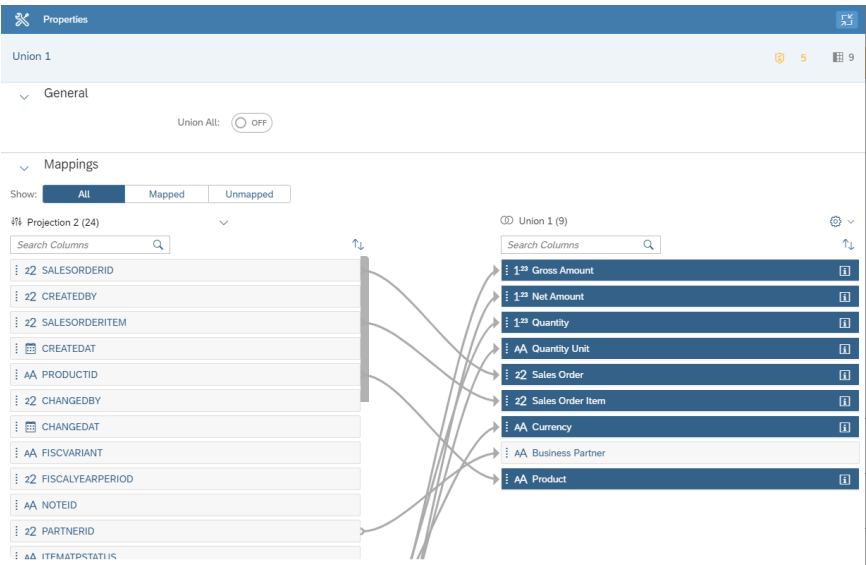

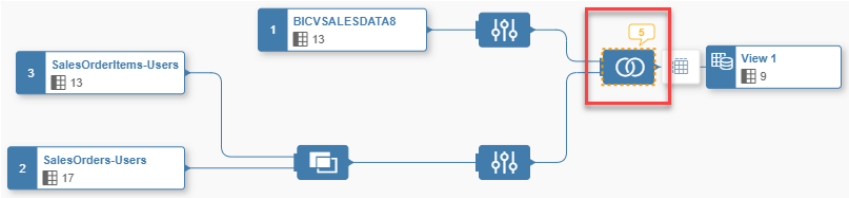

Explanation	Screenshot
<p>58. In the projection properties on the right, click on the three dots at the end of the columns mentioned below and exclude them:</p> <p>InfoProvider</p> <p>Request Transaction Sequence Number</p> <p>Number of Records</p> <p>Sales Order ID</p>	 <p>The screenshot shows the 'Projection Properties' dialog box. At the top, there's a header 'Projection Properties' with a search icon. Below it, 'Projection 1' is listed with a shield icon and '13' records. A 'Select All' button is visible. A search bar labeled 'Search Columns' is present. Below the search bar, a list of columns is shown: 'AA InfoProvider', 'AA Request Transaction Sequence Number', '1.23 Number of Records', '1.23 Gross Amount', '1.23 Net Amount', '1.23 Quantity', 'AA Quantity Unit', '22 Sales Order', '22 Sales Order Item', '22 Sales Order ID', 'AA Currency', 'AA Business Partner', and 'AA Product'. The '22 Sales Order ID' column is highlighted with a red box, and its context menu is open, showing 'Exclude Column' and 'Change Business Name' options.</p>
<p>59. After this, you can see that just 9 of the 13 columns from BICVSALESDATA8 are used in the new graphical view.</p>	 <p>The screenshot shows a graphical view of the data flow. On the left, a box labeled '1 BICVSALESDATA8' with '13' records is connected to a central filter icon. This icon is connected to a box on the right labeled 'View 1' with '9' records. The 'View 1' box is highlighted with a red box, indicating that 9 columns are now used in the view.</p>

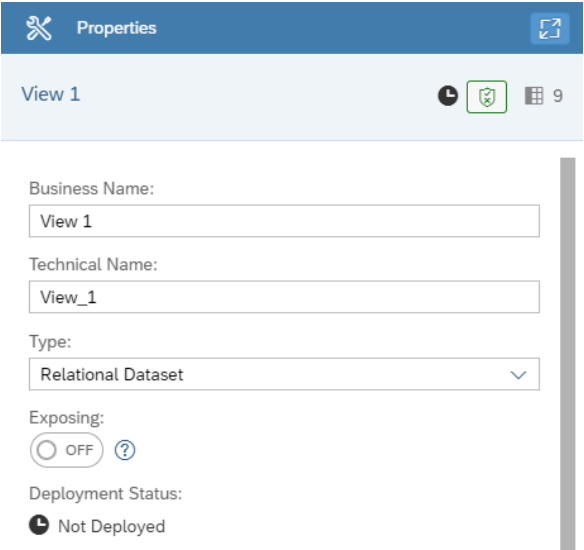

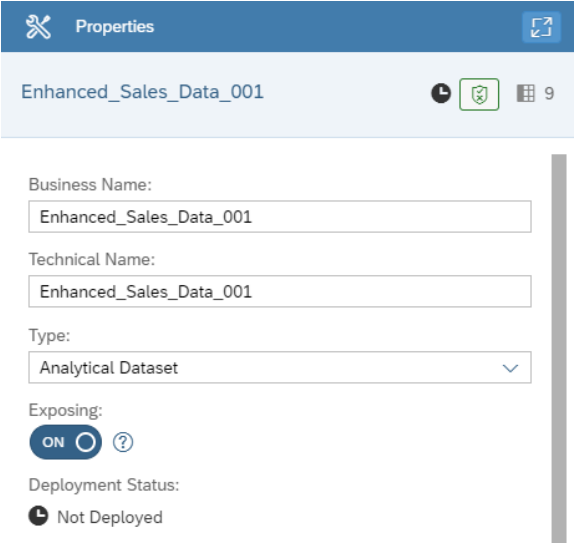

Explanation	Screenshot
<p>60. Drag the table <i>SalesOrders-Users</i> onto the canvas and drop it on top of the projection from BICVSALESDATA8 to create a UNION node.</p> <p>It is important that you drag it onto the projection and not the table itself, as this only gives you the option to JOIN the two.</p> <p><i>[Info]</i> This step might be a bit challenging. We suggest you mark the table, drag it whilst keeping the left mouse button pressed, place it on top of the projection with the left mouse button still pressed, move your mouse to the Union option, and only then release the mouse button.</p>	 <p>The screenshot shows a data flow diagram. On the left, a table node labeled '1 BICVSALESDATA8' with 13 rows is connected to a projection node (represented by a cylinder with three vertical lines). A second table node labeled '2 SalesOrders-Users' with 17 rows is being dragged onto the projection node. A context menu is open over the projection node, showing two options: 'UNION' (highlighted with a green border) and 'JOIN'. The 'UNION' option is represented by a circle with two vertical lines, and the 'JOIN' option is represented by a rectangle with two vertical lines.</p>
<p>61. Mark the UNION node and switch the toggle button for <i>Union All</i> to OFF if it is on.</p>	 <p>The screenshot shows the 'Properties' pane for a node named 'Union 1'. The 'General' tab is selected. Under the 'Union All' section, there is a toggle button labeled 'OFF' with a question mark icon to its right. The 'Union 1' node is highlighted in blue, and its icon (a circle with two vertical lines) is shown next to the name.</p>
<p>62. Drag the table <i>SalesOrderItems-Users</i> onto the canvas and drop it on top of <i>SalesOrder-Users</i> to create a JOIN of the two tables.</p>	 <p>The screenshot shows the final data flow diagram. It includes three table nodes: '1 BICVSALESDATA8' (13 rows), '2 SalesOrders-Users' (17 rows), and '3 SalesOrderItems-Users' (13 rows). The 'SalesOrderItems-Users' table is connected to the 'SalesOrders-Users' table via a JOIN node (rectangle with two vertical lines). The output of this JOIN is connected to a UNION node (circle with two vertical lines). The 'BICVSALESDATA8' table is also connected to the same UNION node. The final output of the UNION node is 'View 1' (9 rows).</p>

Explanation	Screenshot
63. Click on the JOIN node and ensure that the two tables have been joined on SALESORDERID.	

Explanation	Screenshot
<p>64. Click on the UNION node again and change to <i>Projection 1</i> in the <i>Mapping</i> section by choosing it from the drop-down menu.</p> <p>Since Projection 1 is the projection of table BICVSALESDATA8 to the view we are creating, the mapping between the source and target fields should be 1:1.</p>	

Explanation	Screenshot
<p>65. In the <i>Mapping</i> section, change back to <i>Projection 2</i>.</p> <p>To get a better view for editing the mappings, click on  to expand the Properties view.</p>	

Explanation	Screenshot
<p>66. Map the following source fields to the mentioned target fields by using drag and drop:</p> <p>GROSSAMOUNT → Gross Amount</p> <p>NETAMOUNT → Net Amount</p> <p>QUANTITY → Quantity</p> <p>QUANTITYUNIT → Quantity Unit</p> <p>SALESORDERID → Sales Order</p> <p>SALESORDERITEM → Sales Order Item</p> <p>CURRENCY → Currency</p> <p>PARTNERID → Business Partner</p> <p>PRODUCTID → Product</p> <p>Collapse the Properties view again to return to the canvas.</p>	
<p>67. After mapping all the fields, you will see 5 warnings concerning the difference in data types of the fields from the BW/4HANA data, and the CSV data.</p> <p>These warnings can be ignored.</p>	

Explanation	Screenshot
<p>68. Mark the view <i>View 1</i> and adjust the properties as specified in the next step.</p>	
<p>69. Change the name of the view to Enhanced_Sales_Data_XXX, where XXX is your workshop user number.</p> <p>Change the <i>Type</i> of the view to an Analytical Dataset.</p> <p>Make sure to toggle <i>Exposing</i> to be ON. (If you do not remember to expose the view, you will not be able to add it to a Story in the next steps. Should you forget, you can return to your view and toggle it at any time).</p>	

Explanation

70. In the view properties, go to the section Measures and click on  to edit the measure fields.

Screenshot

Measures (3)						Search	
<input type="checkbox"/>	Business Name	Technical Name	Data Type	Aggregation	Semantic Type	Unit Column	
<input type="checkbox"/>	Gross Amount	4SALESDATA...	Decimal(17, 2)	SUM 			<input checked="" type="checkbox"/>
<input type="checkbox"/>	Net Amount	4SALESDATA...	Decimal(17, 2)	SUM 			<input checked="" type="checkbox"/>
<input type="checkbox"/>	Quantity	4SALESDATA...	Decimal(31, 0)	SUM 	Quantity with Unit 		<input checked="" type="checkbox"/>

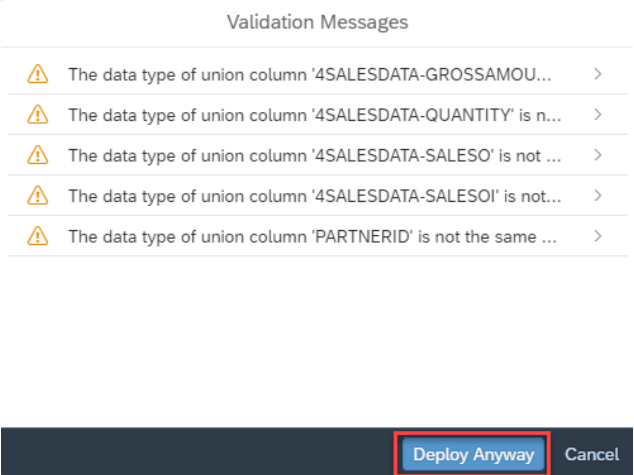

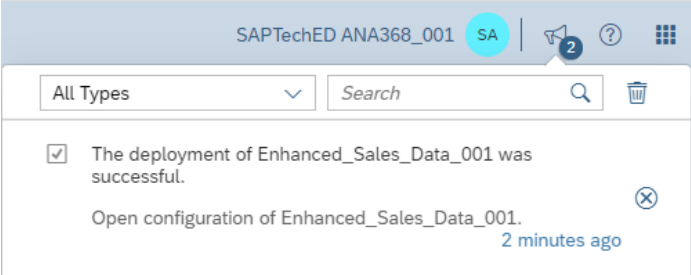

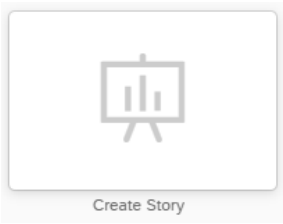

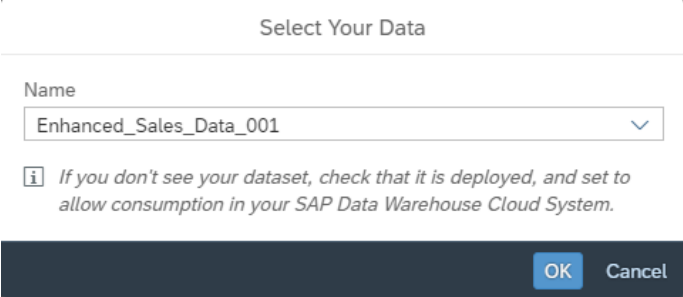

71. Please make the following adjustments to the measures:

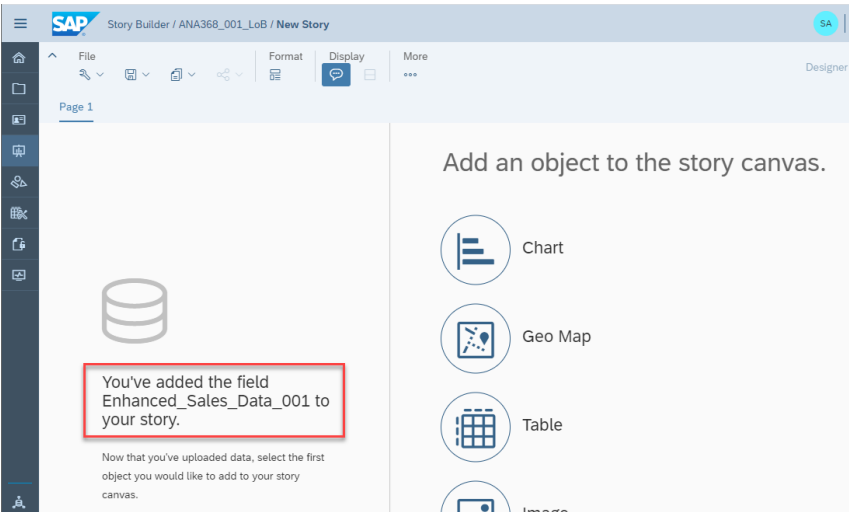

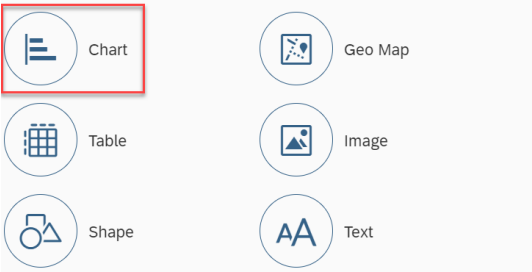

Then click on

Close

Explanation	Screenshot
78. You will see on the left side, that you have added Enhanced_Sales_Data_XXX to the story.	
79. To build the second Story, please choose the object <i>Chart</i> .	

Explanation	Screenshot
<p>80. On the right, in the Designer, please click + Add Measure to add the Measure <i>Gross Amount</i>.</p> <p>Please click on + Add Dimension to add the Dimension <i>Product</i>.</p> <p>There are two Product dimensions to choose from. Choose the one with context <i>_PRODUCT_0 (Product)</i> when you hover over it. This is the product coming from the Associated Dimension view, where you set Product to take the Short Description. If you choose the other Product, you will only get the Product IDs.</p>	<p>The screenshot displays the Tableau Builder interface. At the top, the 'Data Source' is 'Enhanced_Sales_Data_001'. The 'Chart Structure' panel shows a 'Comparison' chart type. Under 'Measures', 'Gross Amount' is listed and highlighted with a red box. Under 'Dimensions', 'Product' is listed and highlighted with a red box. Below this, a 'Dimensions' dropdown menu is open, showing a list of dimensions. The 'Product' dimension is selected and highlighted with a red box. The list includes 'CALCULATED DIMENSIONS', 'DIMENSIONS', 'Business Partner', 'Currency', 'Product', 'Price', 'Product Category', 'Quantity Unit', 'Sales Order', and 'Sales Order Item'.</p>

Explanation	Screenshot																																																																																						
<p>81. You can manipulate the size of the chart by pulling it larger on the canvas.</p> <p>If everything has worked as expected, you should have the following chart in your Story.</p> <p>You have now built your second Story which combined the sales data imported from BW/4HANA and the sales data uploaded from CSV files.</p>	 <p>Gross Amount per Product</p> <p>in USD</p> <table border="1"> <thead> <tr> <th>Product</th> <th>Gross Amount (USD)</th> </tr> </thead> <tbody> <tr><td>BMX Vintage 1011</td><td>2,778,260.00</td></tr> <tr><td>BMX Jump 1012</td><td>1,790,834.00</td></tr> <tr><td>BMX Jump Lux I</td><td>5,199,569.00</td></tr> <tr><td>BMX Jump Lux II</td><td>1,750,122.00</td></tr> <tr><td>BMX Optima</td><td>2,796,048.00</td></tr> <tr><td>BMX Optima II</td><td>2,054,974.00</td></tr> <tr><td>La Plage</td><td>1,871,075.00</td></tr> <tr><td>La Plage Limited</td><td>1,563,359.00</td></tr> <tr><td>La Plage Gold</td><td>3,798,367.00</td></tr> <tr><td>Cyclone Basic</td><td>2,368,138.00</td></tr> <tr><td>Cyclone Speed</td><td>1,684,759.00</td></tr> <tr><td>Cyclone III</td><td>3,958,821.00</td></tr> <tr><td>Rooty Basic</td><td>2,253,586.00</td></tr> <tr><td>Capricorn</td><td>1,978,384.00</td></tr> <tr><td>Capricorn II</td><td>2,976,135.00</td></tr> <tr><td>Flash Drive</td><td>2,395,925.00</td></tr> <tr><td>Flash Drive II</td><td>1,937,764.00</td></tr> <tr><td>Lazy Cat</td><td>1,421,251.00</td></tr> <tr><td>Lazy Cat II</td><td>4,105,626.00</td></tr> <tr><td>Speedeon</td><td>2,159,577.00</td></tr> <tr><td>Speedeon Light</td><td>4,050,217.00</td></tr> <tr><td>Speedeon Cross</td><td>4,724,358.00</td></tr> <tr><td>Star Cruise</td><td>2,420,526.00</td></tr> <tr><td>Star Cruise II</td><td>1,568,844.00</td></tr> <tr><td>Universal One</td><td>2,633,194.00</td></tr> <tr><td>Universal Two</td><td>1,915,214.00</td></tr> <tr><td>Specifica</td><td>2,140,923.00</td></tr> <tr><td>Specifica Gold</td><td>1,381,125.00</td></tr> <tr><td>Mt Discovery B</td><td>2,441,169.00</td></tr> <tr><td>Mt Discovery Drive</td><td>1,963,465.00</td></tr> <tr><td>Mt Discovery Rush</td><td>4,372,959.00</td></tr> <tr><td>Mt Discovery Ulti</td><td>2,115,290.00</td></tr> <tr><td>Tornado I</td><td>1,556,364.00</td></tr> <tr><td>Tornado II</td><td>3,680,211.00</td></tr> <tr><td>Stream I</td><td>2,257,134.00</td></tr> <tr><td>Stream II</td><td>2,672,917.00</td></tr> <tr><td>Veloflash</td><td>3,745,831.00</td></tr> <tr><td>Veloflash SE</td><td>2,022,040.00</td></tr> <tr><td>Veloflash Ultimate</td><td>3,471,799.00</td></tr> <tr><td>Roady 1001</td><td>1,544,477.00</td></tr> <tr><td>Roady 1002</td><td>1,939,111.00</td></tr> <tr><td>Roady 1003</td><td>1,899,033.00</td></tr> </tbody> </table>	Product	Gross Amount (USD)	BMX Vintage 1011	2,778,260.00	BMX Jump 1012	1,790,834.00	BMX Jump Lux I	5,199,569.00	BMX Jump Lux II	1,750,122.00	BMX Optima	2,796,048.00	BMX Optima II	2,054,974.00	La Plage	1,871,075.00	La Plage Limited	1,563,359.00	La Plage Gold	3,798,367.00	Cyclone Basic	2,368,138.00	Cyclone Speed	1,684,759.00	Cyclone III	3,958,821.00	Rooty Basic	2,253,586.00	Capricorn	1,978,384.00	Capricorn II	2,976,135.00	Flash Drive	2,395,925.00	Flash Drive II	1,937,764.00	Lazy Cat	1,421,251.00	Lazy Cat II	4,105,626.00	Speedeon	2,159,577.00	Speedeon Light	4,050,217.00	Speedeon Cross	4,724,358.00	Star Cruise	2,420,526.00	Star Cruise II	1,568,844.00	Universal One	2,633,194.00	Universal Two	1,915,214.00	Specifica	2,140,923.00	Specifica Gold	1,381,125.00	Mt Discovery B	2,441,169.00	Mt Discovery Drive	1,963,465.00	Mt Discovery Rush	4,372,959.00	Mt Discovery Ulti	2,115,290.00	Tornado I	1,556,364.00	Tornado II	3,680,211.00	Stream I	2,257,134.00	Stream II	2,672,917.00	Veloflash	3,745,831.00	Veloflash SE	2,022,040.00	Veloflash Ultimate	3,471,799.00	Roady 1001	1,544,477.00	Roady 1002	1,939,111.00	Roady 1003	1,899,033.00

Explanation	Screenshot
82. Save your Story. You can name it Sales_Data_Combined_XXX or choose another name.	

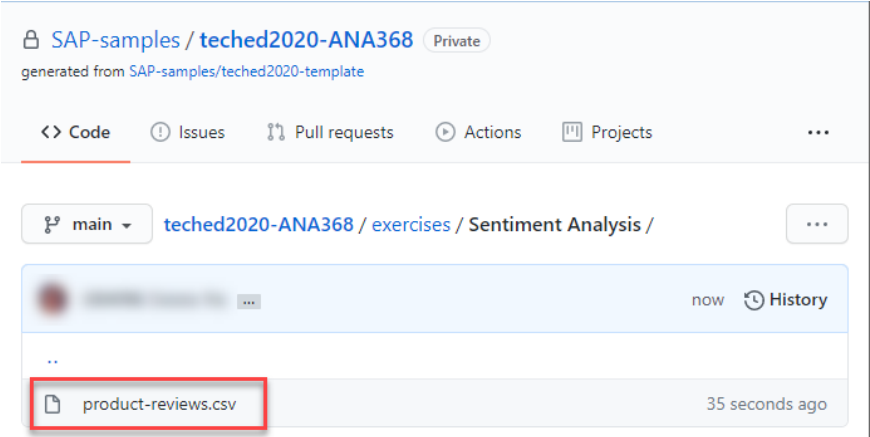

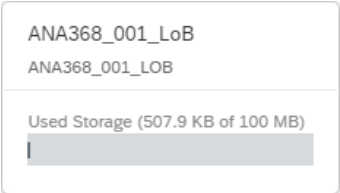

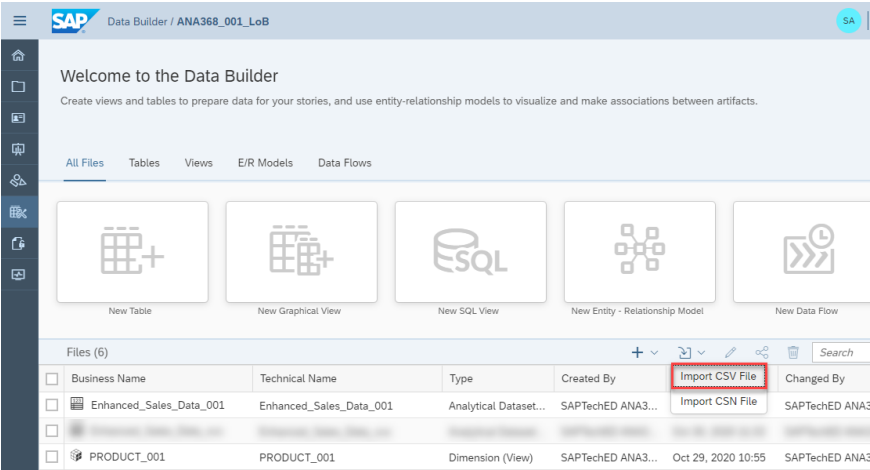

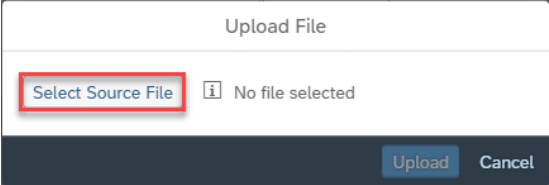

8. EXPAND THE DATA MODEL IN DWC WITH SENTIMENT ANALYSIS

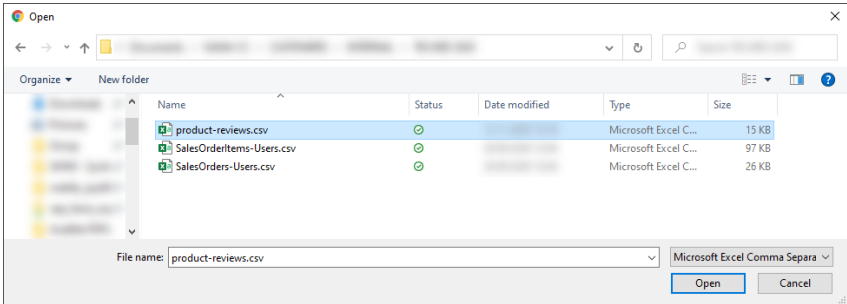

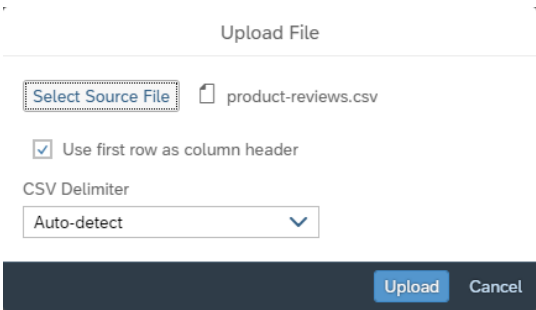

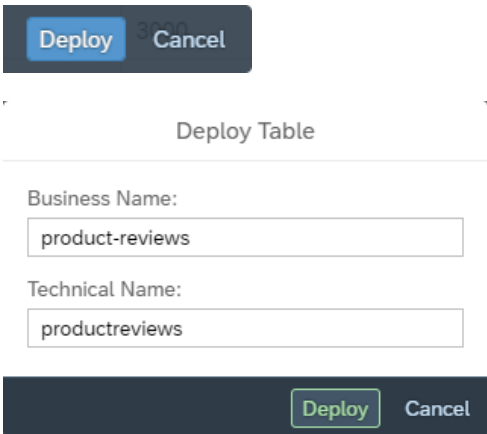

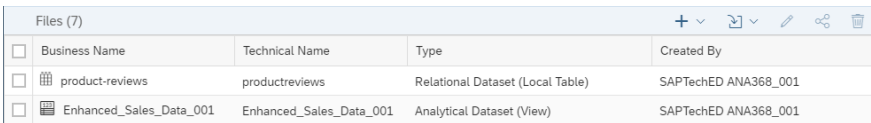

This last exercise is entirely optional for you, if you have time left over after completing the preceding exercises.

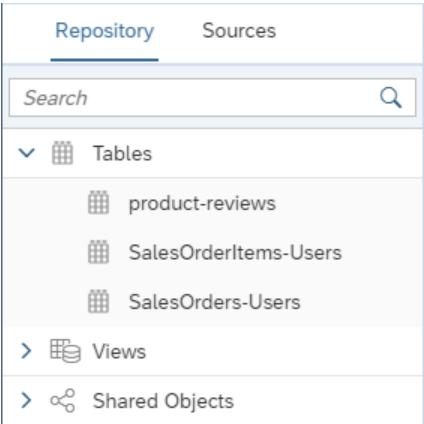

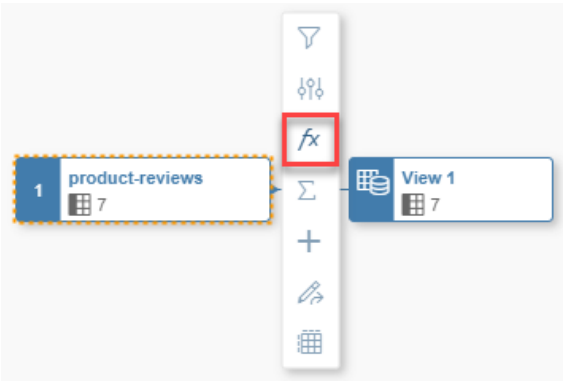

Exercise Description

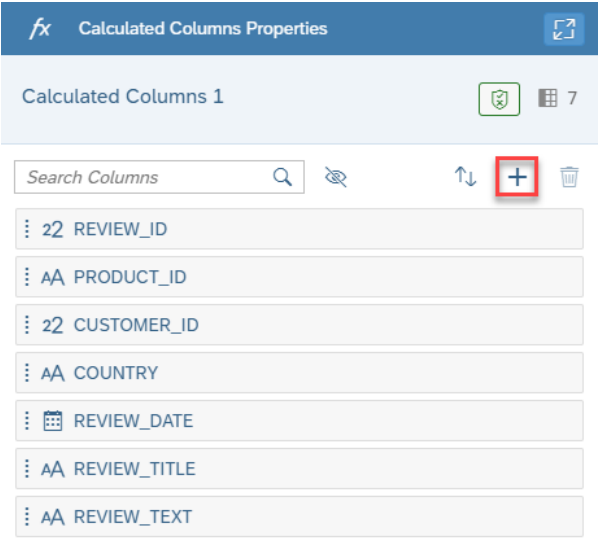

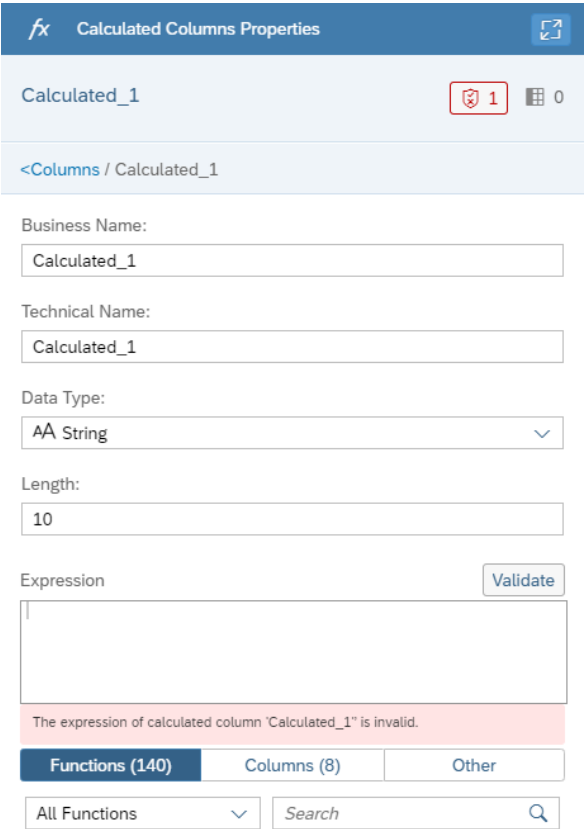

You will learn

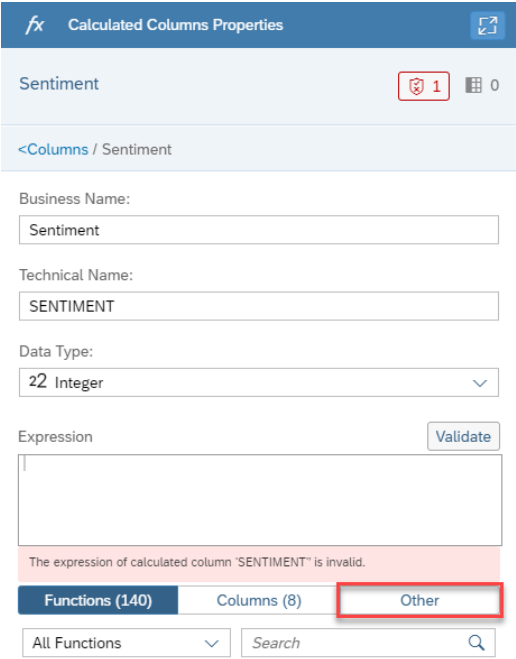

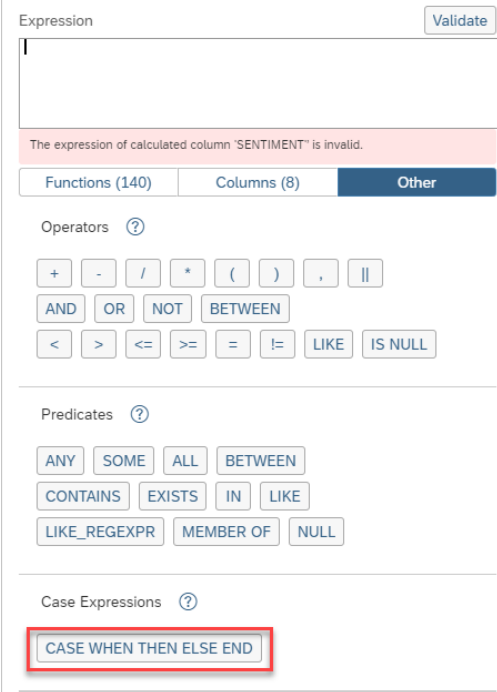

- To add sentiment analysis to your data model

Explanation	Screenshot
<p>83. To import the table needed for this exercise, you will be using the flat file import again, as you did already for exercise 5.</p> <p>Please go to the provided GitHub page for this workshop (teched2020-ANA368) and download the CSV file called product-reviews.csv from the <i>Sentiment Analysis</i> folder.</p>	
<p>84. Back in DWC, please go to the Data Builder.</p> <p> Data Builder</p> <p>In the Data Builder, make sure that you choose your LoB Space.</p>	
<p>85. In your LoB Space, click the  button, and choose Import CSV File.</p>	
<p>86. Click Select Source File in the pop-up.</p>	

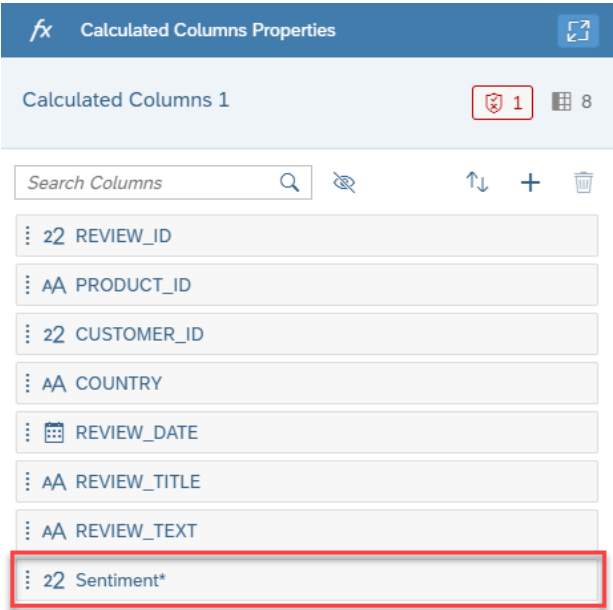

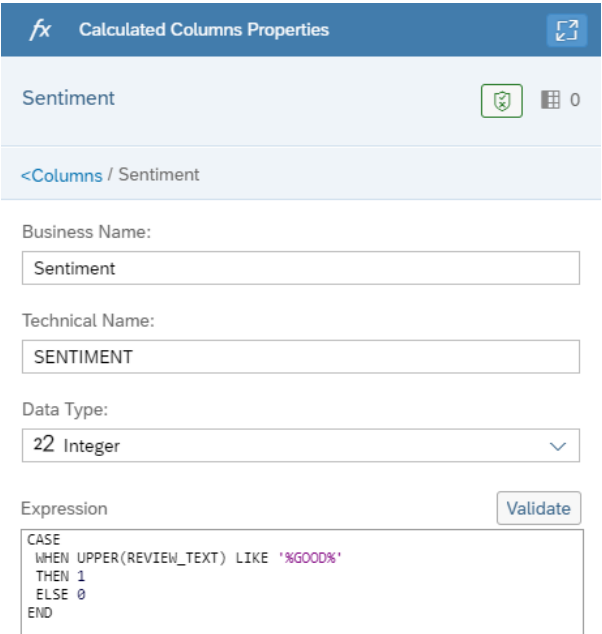

Explanation	Screenshot
<p>87. Choose the product-reviews.csv file from the directory where you downloaded it to.</p> <p>Click on <i>Open</i>.</p>	
<p>88. Leave the default settings and click on <i>Upload</i>.</p>	
<p>89. Once the data has loaded, a preview will be displayed and you will get the option to deploy the table.</p> <p>Click on <i>Deploy</i> at the bottom of the screen.</p> <p>Leave the default Business Name and Technical Name, and click on Deploy again in the pop-up.</p>	
<p>90. Once the deployment has completed, you will see the file in the list in the Data Builder.</p>	
<p>91. In the Data Builder, please click on <i>New Graphical View</i>.</p>	

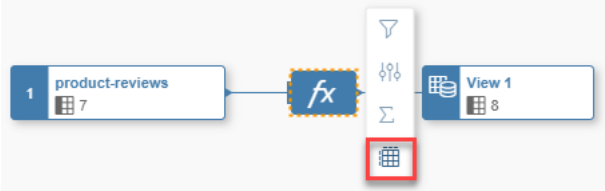

Explanation	Screenshot
92. In the graphical view editor, you will see your new table product-reviews under the <i>Repositories</i> tab, and <i>Tables</i> .	 The screenshot shows a software interface with two tabs: 'Repository' (selected) and 'Sources'. Below the tabs is a search bar labeled 'Search'. Under the 'Repository' tab, there is a section for 'Tables' which is expanded. It lists three tables: 'product-reviews', 'SalesOrderItems-Users', and 'SalesOrders-Users'. Below the 'Tables' section, there are two other sections: 'Views' and 'Shared Objects', both of which are collapsed.
93. Drag the product-reviews table onto the canvas.	 The screenshot shows a graphical view editor canvas. On the left, there is a blue and white rectangular icon representing the 'product-reviews' table. An orange line indicates it is being dragged towards the right. On the right side of the canvas, there is a box labeled 'View 1' which contains a table icon and the number '0'. A red speech bubble with the number '1' is next to the 'View 1' box.
94. With the table marked, click on <i>fx</i> to add a calculated column.	 The screenshot shows the graphical view editor canvas. On the left, there is a box labeled '1' containing the text 'product-reviews' and a table icon with the number '7'. An arrow points from this box to a central vertical toolbar. The toolbar contains several icons: a funnel, a filter icon, a red box around the 'fx' icon (highlighted), a summation symbol (Σ), a plus sign (+), a pencil icon, and a table icon. To the right of the toolbar is a box labeled 'View 1' containing a table icon and the number '7'.

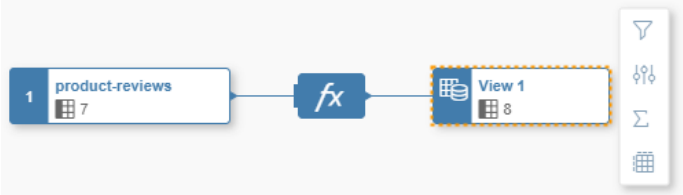

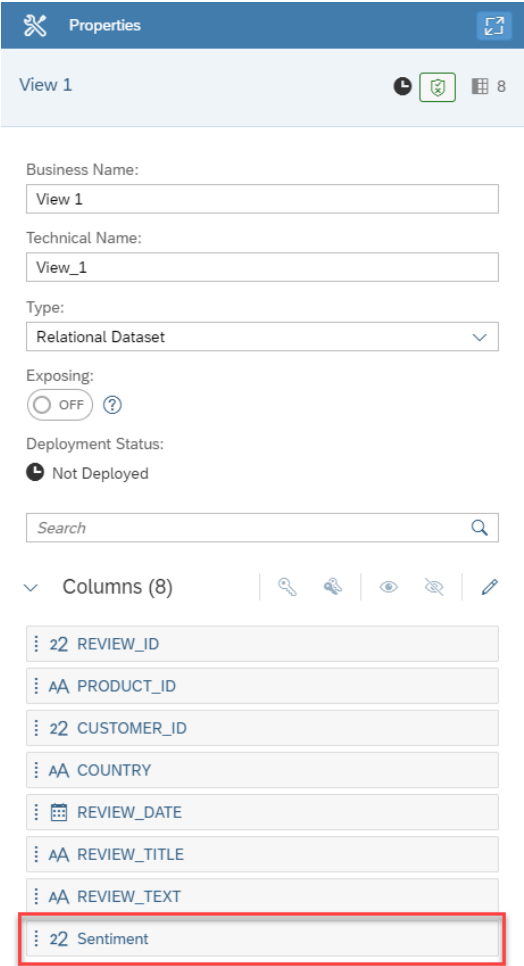

Explanation	Screenshot
<p>95. On the right, the properties for the calculated columns opens. If it does not open automatically, click on <i>Details</i> in the top right corner.</p> <p>Click on  to add a new column.</p>	
<p>96. The properties for the new calculated column opens.</p>	

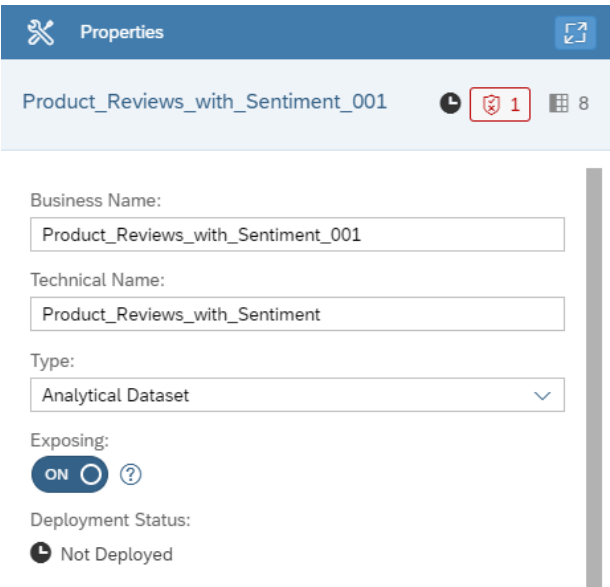

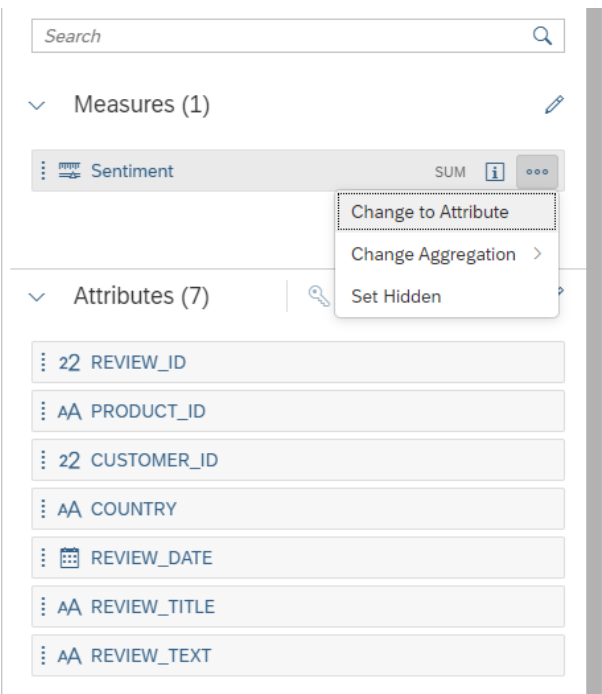

Explanation	Screenshot
<p>97. Change the names and data type as follows and click on the tab <i>Other</i>.</p> <p>Business Name: Sentiment</p> <p>Technical Name: SENTIMENT</p> <p>Data Type: Integer</p> <p><i>[Info] Sometimes the Data Type returns to its default value of String, so please make sure that it is still an integer before you leave the properties.</i></p>	 <p>The screenshot shows the 'Calculated Columns Properties' dialog box. The 'Sentiment' column is selected. The 'Business Name' is 'Sentiment', 'Technical Name' is 'SENTIMENT', and 'Data Type' is '22 Integer'. The 'Expression' field is empty. A red box highlights the 'Other' tab at the bottom.</p>
<p>98. At the bottom, choose to add a Case Expression: <i>CASE WHEN THEN ELSE END</i></p> <p><i>[Info] The Expression field also takes free text, so if you prefer to write the CASE WHEN expression yourself, feel very free.</i></p>	 <p>The screenshot shows the 'Calculated Columns Properties' dialog box, with the 'Other' tab selected. The 'Expression' field is empty. A red box highlights the 'CASE WHEN THEN ELSE END' option at the bottom.</p>

Explanation	Screenshot																																																	
<p>99. The expression is copied to the <i>Expression</i> box.</p> <p>Here, you can format the CASE WHEN expression to look for positive and negative reviews in your product-reviews table.</p>																																																		
<p>100. To see what kind of review data you have in the product-reviews table, mark the table and click on  to see a data preview at the bottom of the screen.</p> <p><i>Important:</i> if you do not get a data preview, you may still have marked the calculated column – make sure to mark the table on the canvas.</p>																																																		
<p>101. In this example, to get the sentiment information for the sentiment analysis, we use the CASE WHEN expression to read through the column <i>REVIEW_TEXT</i> of the table product-reviews.</p> <p>By looking at some of the reviews in the table, you can already see some of the words used to describe whether they are happy customers or not.</p> <p>(Do not take the text in the reviews too seriously, these are only example reviews)</p>	<table><tr><th>REVIEW_ID</th><th>PRODUCT_ID</th><th>CUSTOMER_ID</th><th>COUNTRY</th><th>REVIEW_DATE</th><th>REVIEW_TITLE</th><th>REVIEW_TEXT</th></tr><tr><td>1073</td><td>RC-1052</td><td>1000000022</td><td>CA</td><td>2020-05-18</td><td>1010 points</td><td>1010..... the best laptop in world. apple products are amazing, you will never regret it buying. Explanation	Screenshot
<p>102. Go back to the calculated column by marking  on the canvas and clicking on your newly created Sentiment column in the <i>properties</i> box.</p> <p>(If your CASE WHEN expression has disappeared from the <i>Expression</i> box, just click it again)</p>	
<p>103. Format the CASE WHEN expression, and add a first case, to check if the expression is working as expected.</p> <p>You can create expressions faster by using the input help.</p> <p>The expression in the screenshot here reads the column REVIEW_TEXT, sets all characters to be upper case with the <i>UPPER()</i> function, and compares them to our word with the <i>LIKE</i> function. For this reason, we also write our search term in upper case.</p> <p>We also need to put the term in quotation marks to mark it as a <i>String</i>, and we add the wildcards (%) on each side to include words that contain the string 'good', without needing to be an exact match.</p>	

Explanation	Screenshot														
104. Now you can see the data preview directly on the calculated column node.															
105. If you do not have any syntax errors in your expression, the data preview opens, and you can see that the new column <i>Sentiment</i> has been filled with either ones or zeros.	<table border="1"> <thead> <tr> <th>REVIEW_TEXT</th><th>SENTIMENT</th></tr> </thead> <tbody> <tr> <td>No technical marvel but seems to be the best laptop in a price segment of Rs 55-60K.</td><td>0</td></tr> <tr> <td>Very disappointed as this seems to be a second hand product! REVIEW_TEXT	Sentiment														
No technical marvel but seems to be the best laptop in a price segment of Rs 55-60K.	0														
Very disappointed as this seems to be a second hand product! Moreover the battery power is very L...	0														
very bad. My product is not working what do I do ? I have paid everything! This is very very bad .	-1														
waste of money. Battery is draining out very quickly after 2-3 hours of usage. Also it's not lasting for ...	-1														
Good product. But we are not getting on line support for any operation issue in ipad.	1														
One star. scanner not working... tried 2 contact amazon.. not picking	0														

Explanation	Screenshot
108. Mark the view on the canvas.	
109. In the Properties pane on the right, you should be able to see that your <i>Sentiment</i> column is added.	

Explanation	Screenshot
<p>110. Change the names and type of the view.</p> <p>Business Name: Product_Reviews_with_Sentiment_XXX</p> <p>Technical Name: Product_Reviews_with_Sentiment</p> <p>Type: Analytical Dataset</p> <p>Exposing: ON</p> <p>If you get an error saying that the view cannot be deployed without a Measure, then do not be worried.</p>	 <p>The screenshot shows the 'Properties' panel for a view. The title bar says 'Properties'. Below it, the view name is 'Product_Reviews_with_Sentiment_001'. There are icons for a clock, a shield with a red '1', and a grid with '8'. The panel contains the following fields:</p> <ul style="list-style-type: none"> Business Name: Product_Reviews_with_Sentiment_001 Technical Name: Product_Reviews_with_Sentiment Type: Analytical Dataset (dropdown menu) Exposing: ON (radio button) Deployment Status: Not Deployed (clock icon)
<p>111. Move the <i>Sentiment</i> column to the Measures by either dragging and dropping it, or by clicking the  button at the end of the column and choosing Change to Measure.</p> <p>As well, check to make sure that the aggregation type is SUM, as it is here in the screenshot.</p>	 <p>The screenshot shows the 'Measures' and 'Attributes' panels. The 'Measures' panel has a search bar and a list of measures. One measure, 'Sentiment', is selected, and its aggregation is 'SUM'. A context menu is open over the 'Sentiment' measure, showing options: 'Change to Attribute', 'Change Aggregation', and 'Set Hidden'. The 'Attributes' panel has a search bar and a list of attributes: REVIEW_ID, PRODUCT_ID, CUSTOMER_ID, COUNTRY, REVIEW_DATE, REVIEW_TITLE, and REVIEW_TEXT.</p>

Explanation	Screenshot
112. Deploy your view.	
113. After your view has successfully deployed, you will be able to see it in the overview in the Data Builder for your LoB Space.	
114. In your LoB Space, change to the Story Builder, and click on <i>New Story</i> . In the pop-up, choose your newly created Product_Reviews_with_Sentiment_XXX view.	

Explanation	Screenshot
<p>115. Choose to create another Story of type <i>Chart</i>.</p> <p>In the <i>Builder</i> dialog on the right, add your column Sentiment as a measure, and the column PRODUCT_ID as the dimension.</p>	 <p>The screenshot shows the Tableau Builder interface. At the top, the 'Data Source' is 'Product_Reviews_with_Sentiment_001'. Below this, the 'Chart Structure' is set to 'Comparison'. The 'Chart Orientation' is 'Horizontal'. The 'Measures' section contains 'Sentiment'. The 'Dimensions' section contains 'PRODUCT_ID'. The 'Color' section shows 'Sentiment' as the member, with 'Show As' set to 'Line', 'Pattern' set to 'None', and 'Color' set to 'Blue'.</p>

Explanation	Screenshot																																																																																		
<p>116. Now you can see in your Story which products have been rated positively, and which have been rated negatively.</p> <p>Congratulations! You have reached the end of this TechEd Workshop 😊</p>	<p>Sentiment per PRODUCT_ID</p> <table><thead><tr><th>PRODUCT_ID</th><th>Sentiment</th></tr></thead><tbody><tr><td>(No Value)</td><td>0</td></tr><tr><td>BX-1011</td><td>-1</td></tr><tr><td>BX-1012</td><td>0</td></tr><tr><td>BX-1013</td><td>0</td></tr><tr><td>BX-1014</td><td>0</td></tr><tr><td>BX-1015</td><td>1</td></tr><tr><td>BX-1016</td><td>0</td></tr><tr><td>CB-1161</td><td>0</td></tr><tr><td>CB-1162</td><td>-2</td></tr><tr><td>CB-1163</td><td>-1</td></tr><tr><td>CC-1021</td><td>0</td></tr><tr><td>CC-1022</td><td>-1</td></tr><tr><td>CC-1023</td><td>-1</td></tr><tr><td>DB-1081</td><td>2</td></tr><tr><td>DB-1082</td><td>0</td></tr><tr><td>EB-1131</td><td>-1</td></tr><tr><td>EB-1132</td><td>-1</td></tr><tr><td>EB-1133</td><td>0</td></tr><tr><td>EB-1134</td><td>0</td></tr><tr><td>EB-1135</td><td>-1</td></tr><tr><td>EB-1136</td><td>2</td></tr><tr><td>EB-1137</td><td>-1</td></tr><tr><td>HB-1171</td><td>0</td></tr><tr><td>HB-1172</td><td>-1</td></tr><tr><td>HB-1174</td><td>0</td></tr><tr><td>HB-1175</td><td>-1</td></tr><tr><td>HB-1176</td><td>-1</td></tr><tr><td>MB-1031</td><td>0</td></tr><tr><td>MB-1032</td><td>-1</td></tr><tr><td>MB-1033</td><td>-1</td></tr><tr><td>MB-1034</td><td>0</td></tr><tr><td>RC-1051</td><td>2</td></tr><tr><td>RC-1052</td><td>0</td></tr><tr><td>RC-1053</td><td>0</td></tr><tr><td>RC-1054</td><td>0</td></tr><tr><td>RC-1055</td><td>0</td></tr><tr><td>RC-1056</td><td>1</td></tr><tr><td>RC-1057</td><td>4</td></tr><tr><td>RO-1001</td><td>-3</td></tr><tr><td>RO-1002</td><td>0</td></tr></tbody></table>	PRODUCT_ID	Sentiment	(No Value)	0	BX-1011	-1	BX-1012	0	BX-1013	0	BX-1014	0	BX-1015	1	BX-1016	0	CB-1161	0	CB-1162	-2	CB-1163	-1	CC-1021	0	CC-1022	-1	CC-1023	-1	DB-1081	2	DB-1082	0	EB-1131	-1	EB-1132	-1	EB-1133	0	EB-1134	0	EB-1135	-1	EB-1136	2	EB-1137	-1	HB-1171	0	HB-1172	-1	HB-1174	0	HB-1175	-1	HB-1176	-1	MB-1031	0	MB-1032	-1	MB-1033	-1	MB-1034	0	RC-1051	2	RC-1052	0	RC-1053	0	RC-1054	0	RC-1055	0	RC-1056	1	RC-1057	4	RO-1001	-3	RO-1002	0
